CAYIN xPost is the web-based application software, which offers a combination of essential tools to create rich contents for digital signage in different vertical markets. It provides an easy-to-use platform for instant data entry and further extends the usage of CAYIN SMP players to meet users' requirements of frequent, daily maintenance.

CAYIN xPost contains the following three modules:

- **meetingPost:** It is the content editing software especially for meeting room management. It can display information of a single meeting or the meeting list on the screen.
- **wayfinderPost:** It is content editing software especially for dynamic public sign and direction guiding.
- **lobbyPost:** It is content editing software especially for lobby screens which can display guest room information, currency exchange, weather information, advertisements, commercial films, and ticker.

1. System Environment

1-1 System Structure

* We strongly suggest that xPost should be used in stable network environment.

1-2 System Requirements

Operating System: Windows® 7, Windows® 8.1, Windows® 10, Windows® 11, Windows® server 2012, or Windows® server 2016

Display Resolution: 1024 x 768 or above is recommended

Processor: Intel® Pentium® 4 compatible CPU or above

Memory: 1024 MB or above is recommended

Hard Disk: 200 MB for program and configurations, 10GB minimum for storing data.

Browser: IE 11.125.16299, Edge 41.16299.15.0, Firefox 56.0.2 or Chrome 65.0.3325.146

Compatible SMP player: all SMP-NEO series players

1-3 Software Components

MySQL ver 5.0.41-community-nt for Win32 on ia32 [MySQL Community Edition (GPL)]

Tomcat 9.0

xPost 2.5

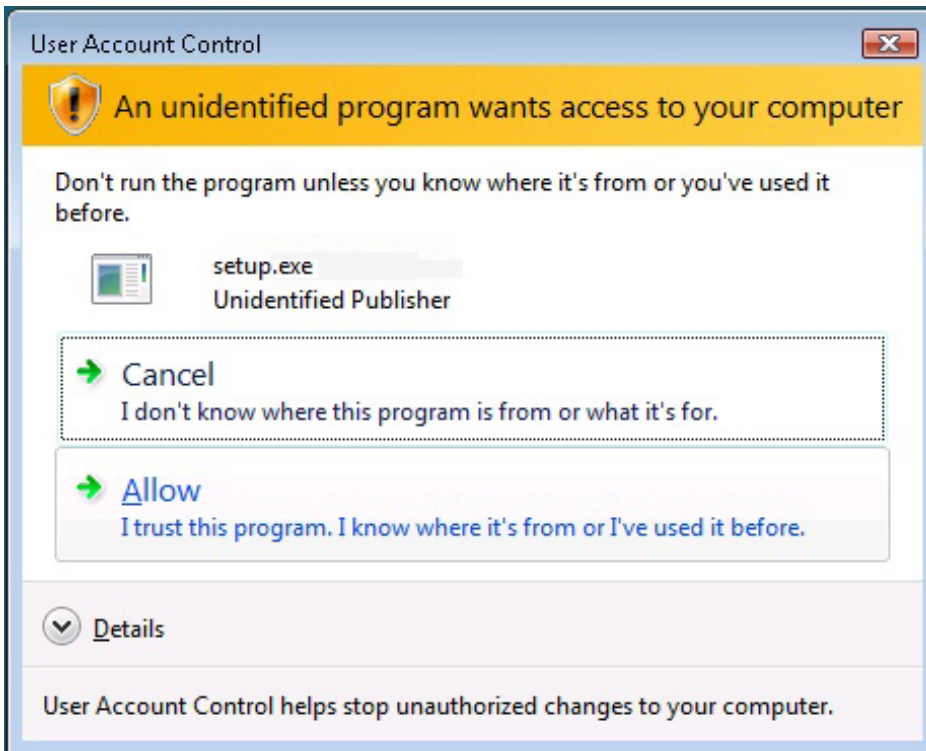

2. Software Installation

2-1 Install xPost

You can install xPost software on any Windows-based PC. Computers that install xPost software will act as xPost servers.

Before installing xPost software on a PC, please make sure the PC meets the system requirements beforehand, and then follow the instructions below:

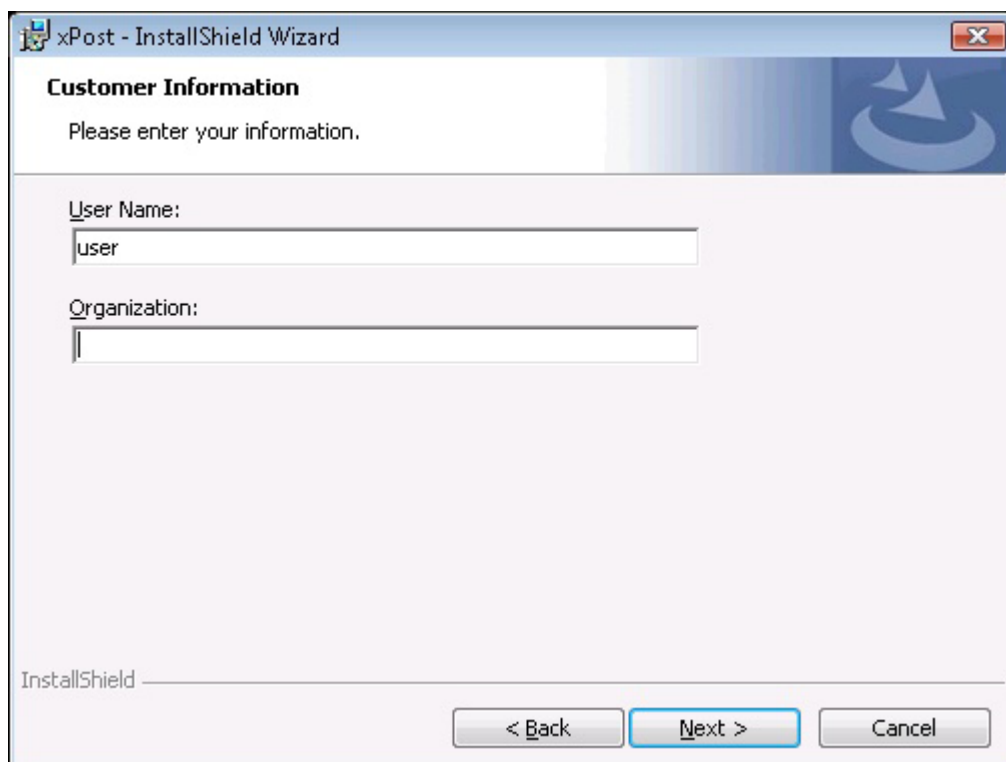

1. Login as system administrator.
2. Double click on setup executable file (.exe).
3. If User Account Control appears, click **Allow**.

4. Click **Next** at the welcome page to continue the installation.

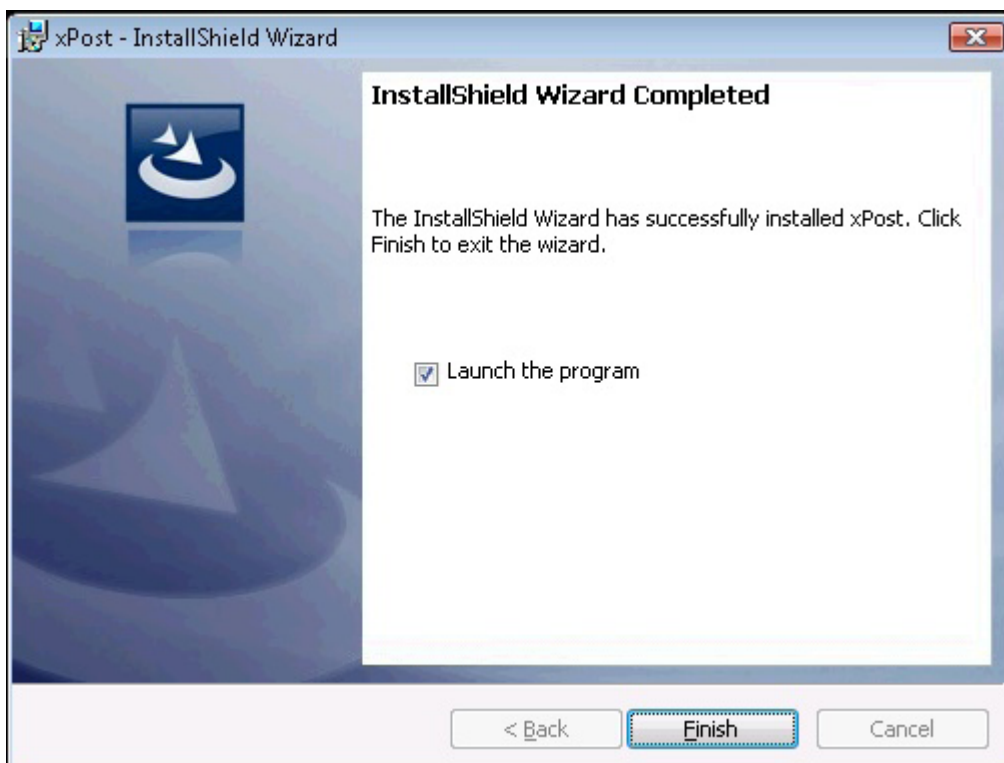

5. Enter **User Name**, **Organization**, and click **Next**.

6. Enable Launch Program, click **Install**, and wait a few seconds until the program finishes the installation.

7. Leave **Launch the program** checked and click **Finish**.

- The system might take two to three minutes to initialize. xPost service will start automatically after installation.

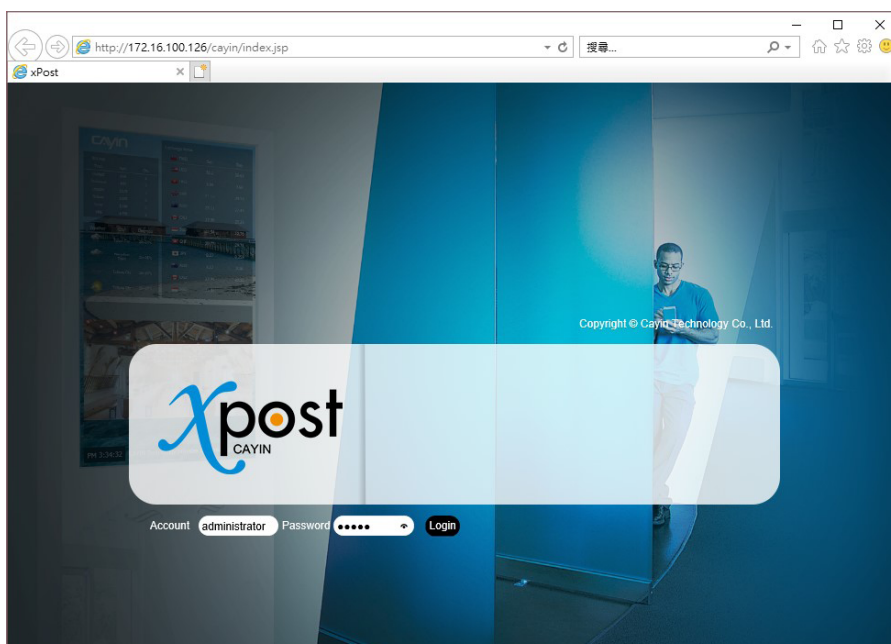

2-2 Activate xPost

After installing xPost, you need to enter the software license number, so that xPost can be activated. By doing so, please follow the steps below to connect to xPost's Web Manager directly from the same PC (xPost server).

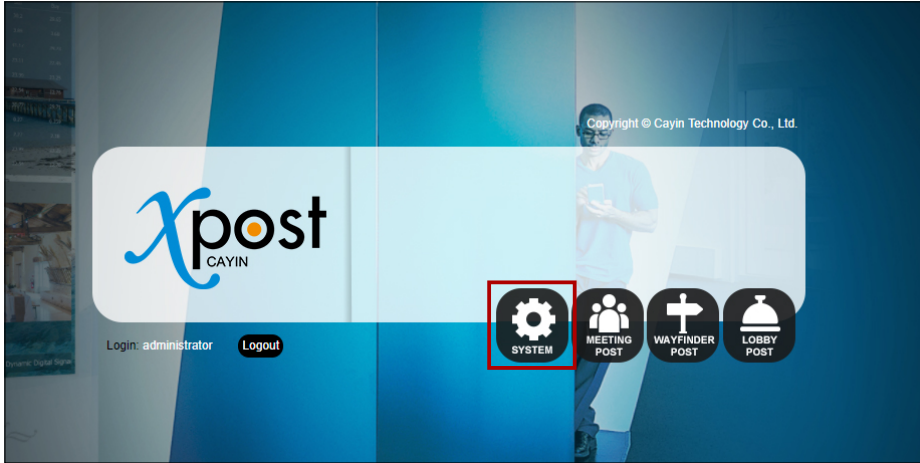

- Open a browser (IE, Firefox or Chrome), and enter the URL (e.g. <http://172.16.100.126>) in the URL field to connect xPost Web Manager. Login the system with the default administrator account.

Account: administrator

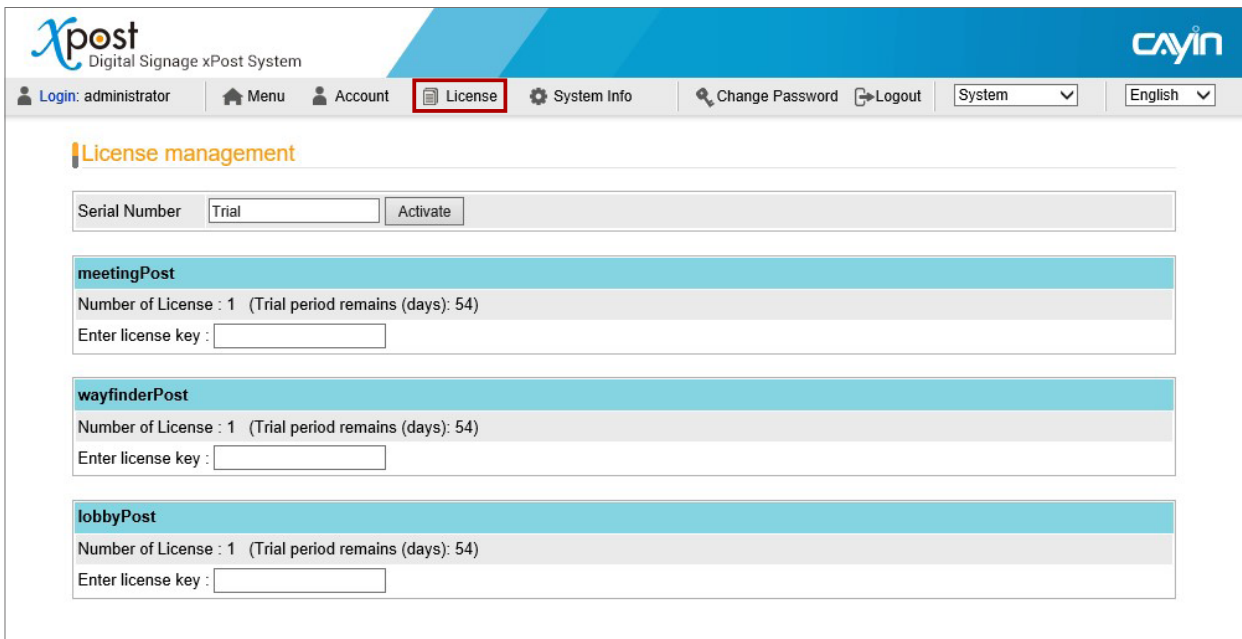

Password: admin

2. After login, you will see the main menu of xPost. Please click **SYSTEM**.

3. You can see three menu items on the top toolbar: **Account**, **License**, and **System Info**. Click **License**; then you can see the page of license management.

4. You need a **Serial Number** and **License Keys** to activate xPost. After purchasing xPost, you will get Serial Number and Key(s) from CAYIN or CAYIN's sales representative. If you plan to try xPost before you buy, CAYIN provides a trial version for you to use xPost with 1 license for each module for 60 days.

5. Enter Serial Number and click **Activate**.

6. After xPost Serial Number is activated, you can enter a valid key for each module, and click **Activate** one by one.

meetingPost
Number of License : 1 (Trial period remains (days): 54)
Enter license key : <input type="text" value="E1234000"/>

wayfinderPost
Number of License : 1 (Trial period remains (days): 54)
Enter license key : <input type="text" value="E1234001"/>

lobbyPost
Number of License : 1 (Trial period remains (days): 54)
Enter license key : <input type="text" value="E1234002"/>

7. After valid keys are entered, you can see the license number is shown on respective sections as you purchase.

meetingPost
Number of License : <input type="text" value="10"/>
Enter license key : <input type="text"/> <input type="button" value="Activate"/>

wayfinderPost
Number of License : <input type="text" value="15"/>
Enter license key : <input type="text"/> <input type="button" value="Activate"/>

lobbyPost
Number of License : <input type="text" value="5"/>
Enter license key : <input type="text"/> <input type="button" value="Activate"/>

8. Now, you finish activating xPost and are ready for using it.

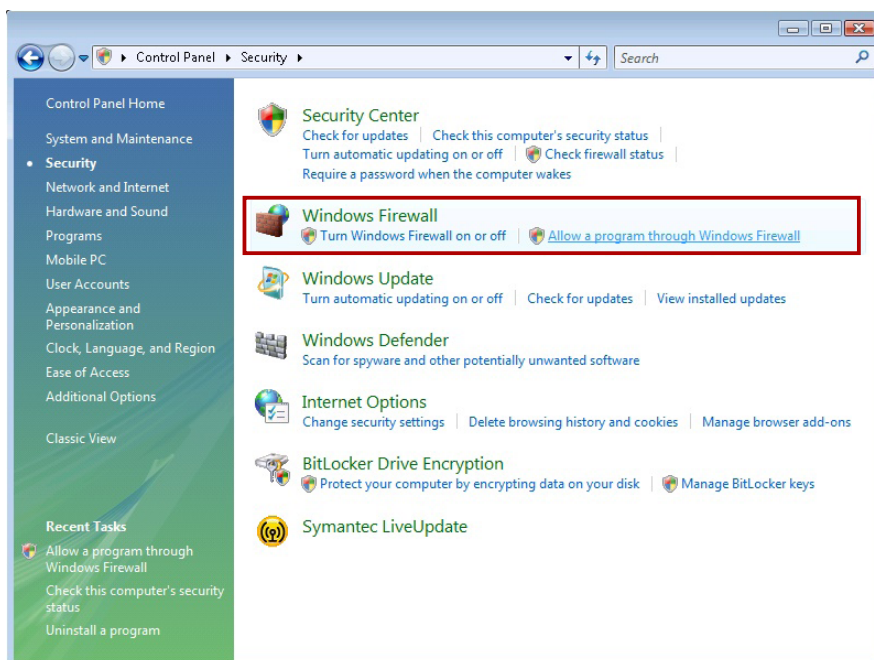

2-3 Configure Firewall of xPost Server

To build the connection between xPost and SMP player and manage xPost from other PCs via network, you need to turn off the firewall of xPost server, so that external devices and other PCs can connect to the server.

The configuration of firewall is variable and depends on the firewall program you use.

We will try to explain the configuration of firewall with the case of Windows Vista as follows.

1. Click on **Control Panel** → **Security** → **Windows Firewall**

2. You can choose either **Turn Windows Firewall off** or **Allow a program through Windows Firewall**.

(1) Turn Windows Firewall off

The procedure will be completed right after you click **Turn Windows Firewall on or off**.

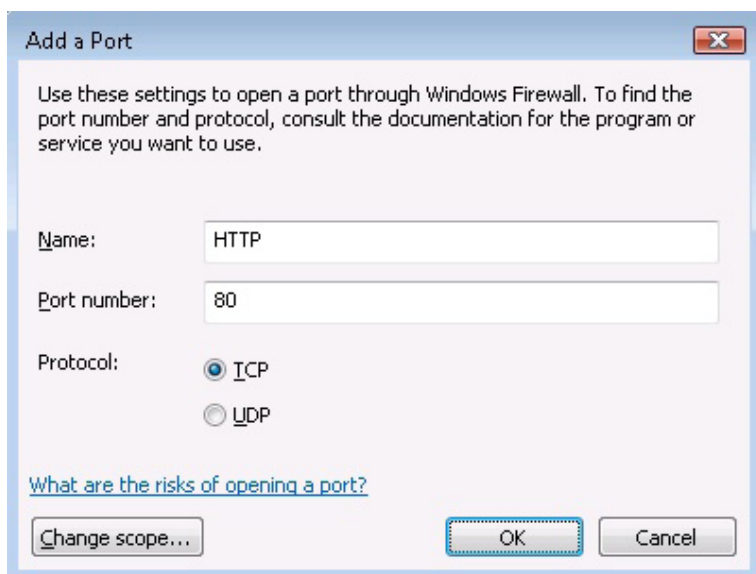

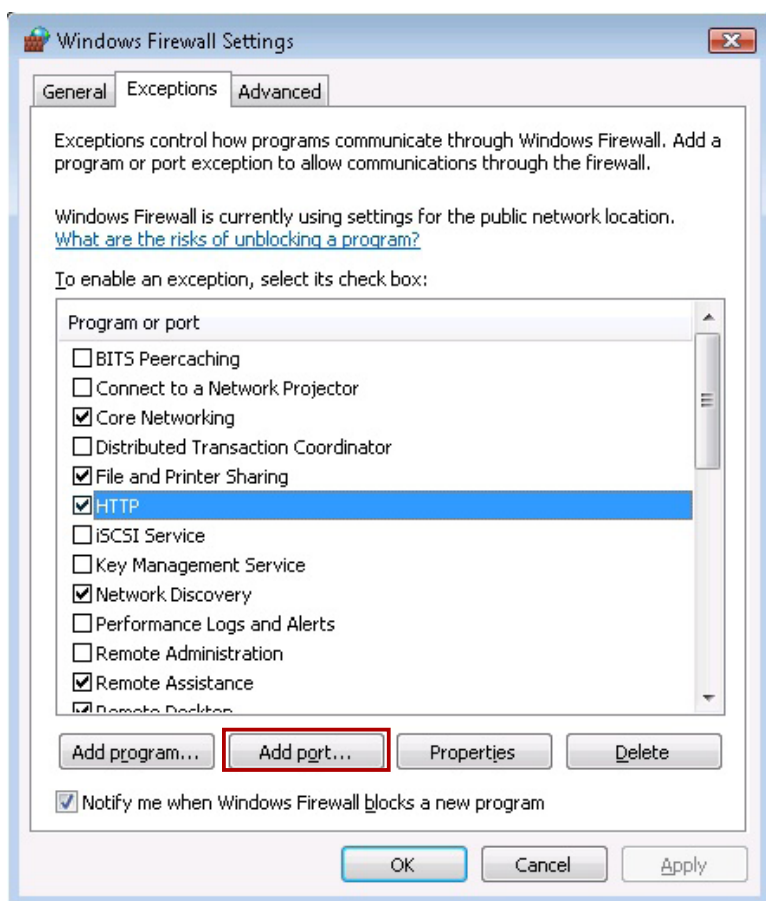

(2) Allow a program through Windows Firewall

If you click this item, you will see a pop-up window, **Windows Firewall Settings**, and need to configure more settings.

i. Click **Add port...** and enter:

Name: HTTP Port Number: 80 Protocol: TCP

- ii. After completing the settings, please click **OK**. Then, you will see the item **HTTP** on the **Windows Firewall Settings**.

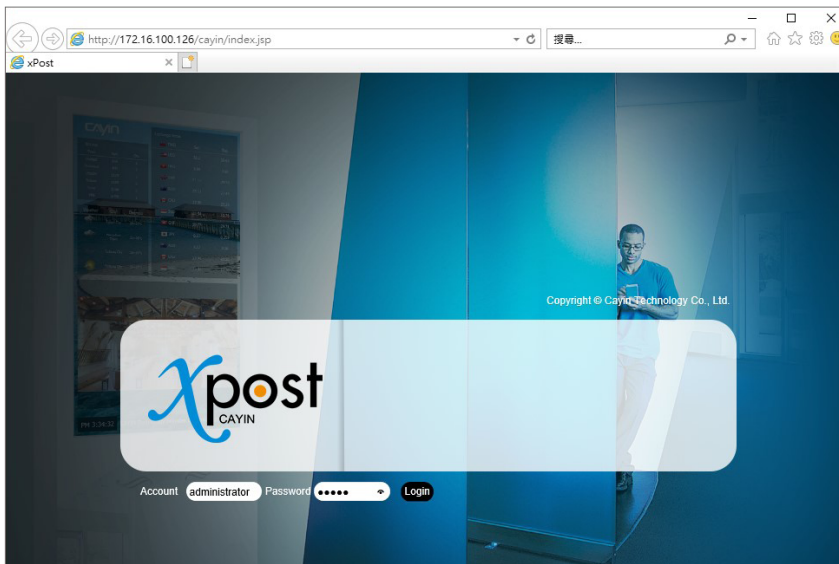

- iii. Confirm the port **HTTP** is checked; then click **OK**.

3. General Operation

3-1 Remote Management - Login

After you turn on the firewall of xPost server, you can access xPost Web Manager by using a browser remotely.

1. Open a browser and type the IP address of your xPost server.

2. Login the system with the default administrator account.

Account: administrator

Password: admin

3. After login, you will see the main menu of xPost: system, meetingPost, wayfinderPost, and lobbyPost.

Click one of the buttons and start to operate xPost.

3-2 Introduction of User Interface

All main functions are placed on the toolbar. You can change settings and add data in the configuration area of each function.

Login user name

Go to the main menu

The sub-menu of each module

Change password or logout

Switch between modules

Select a UI language

Toolbar

Configuration area for each function

Account settings

Maximum number : 1000

Index	*Account (5~16 letters)	Note	Edit	X Delete
1.	administrator			<input type="checkbox"/>
2.	xpostdemo			<input type="checkbox"/>

Add Apply

3-2-1 Select a User Interface Language

xPost supports web manager UI in 8 languages: English, Spanish, German, Italian, French, Japanese, Traditional Chinese and Simplified Chinese. You can switch to different languages on the right top side of the toolbar.

English

Español

正體中文

簡體中文

Deutsch

Italiano

Français

日本語

3-2-2 Switch between Modules

xPost contains four modules – **System**, **meetingPost**, **wayfinderPost**, and **lobbyPost**. You can switch UI between these modules by clicking the correspondent button on the main menu or selecting the right program on the right top toolbar.

System

meetingPost

wayfinderPost

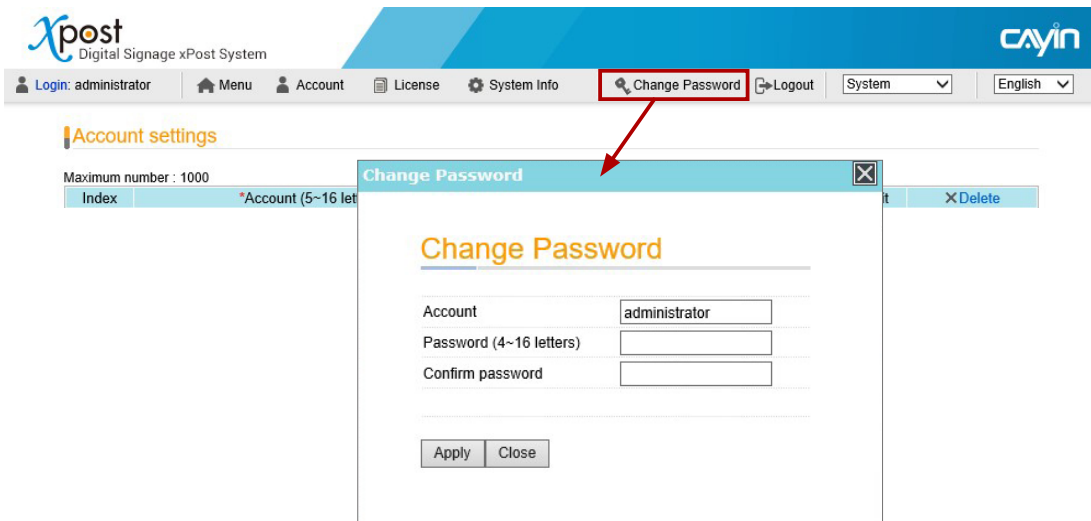

lobbyPost

After you select a module, the sub-menu will display its correspondent functions.

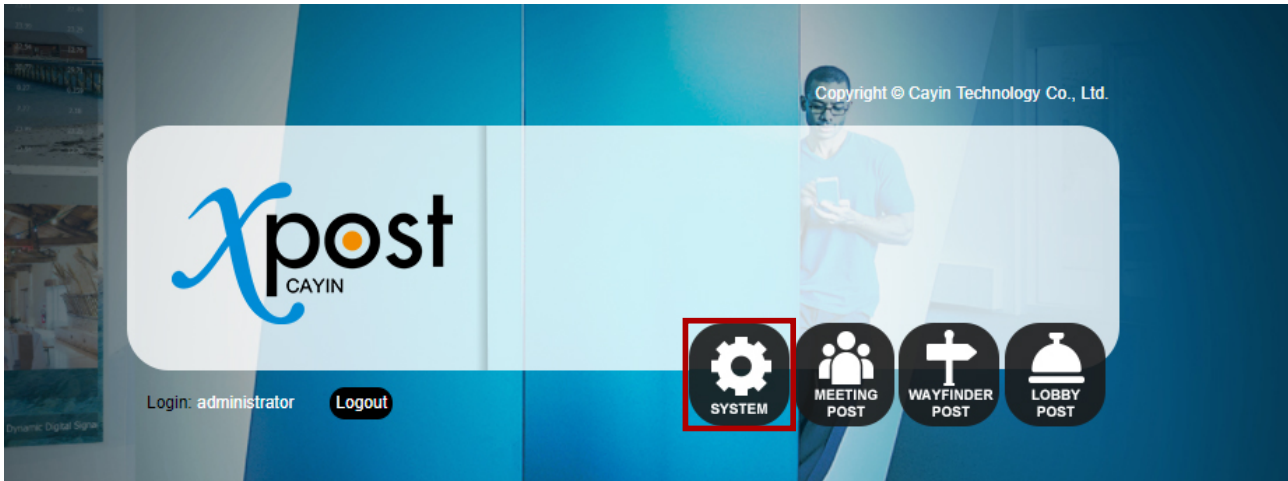

3-2-3 Change Password

Users can change their own passwords by clicking the item **Change Password** on the toolbar. The administrator will not keep the record of the user password in the system. Therefore, the administrator needs to reset passwords in the **System** module (Account settings) if users forget passwords.

4. System Configuration

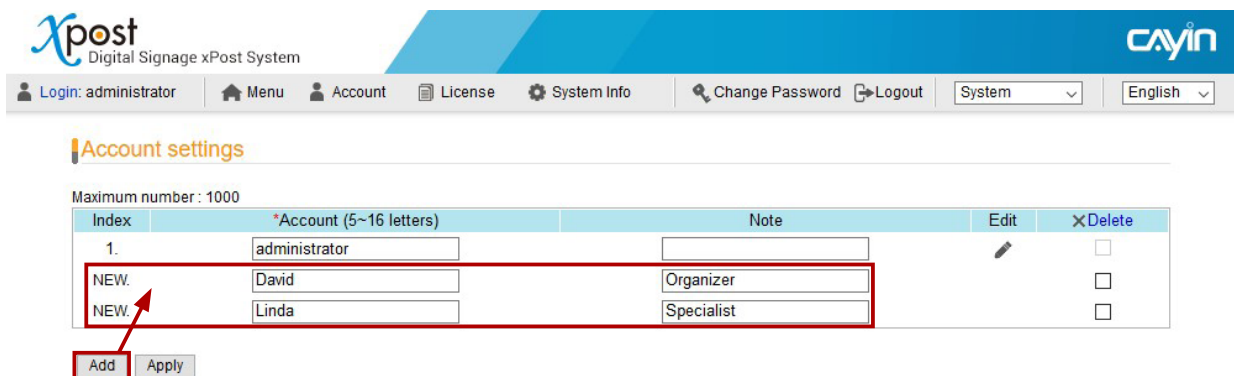

You can configure **Account** and manage **License** on the **System** module. Login xPost Web Manager and click on **SYSTEM**.

4-1 Add/Edit Account

Here you can add a new account (user) to manage xPost functions. You can also assign different access rights to each account.

1. Login xPost and enter Web Manager
2. Click **SYSTEM** on the main menu, and **Account** on the toolbar; then you will see the page of **Account settings**.
3. You can add several new users at a time by clicking the **Add** button on **Account** settings page.

4. Fill in **Account** names and **Note** (optional). After adding all accounts you need, please click **Apply**.

NOTE

The minimum length of an account name is 5 characters.

5. After an account is added, you can click the **Edit** button for each new account to set the password and access rights for that account.

User access control

Account	<input type="text" value="David"/>
Password (4~16 letters)	<input type="password"/>
Confirm password	<input type="password"/>

Access right of System module	
Account settings	<input type="text" value="Disable"/> ▾
License	<input type="text" value="Disable"/> ▾

Access right of meetingPost	
Calendar	<input type="text" value="Disable"/> ▾
Display	<input type="text" value="Disable"/> ▾
Master	<input type="text" value="Disable"/> ▾

Access right of wayfinderPost	
Data	<input type="text" value="Disable"/> ▾
Display	<input type="text" value="Disable"/> ▾

Access right of lobbyPost	
Data	<input type="text" value="Disable"/> ▾
Display	<input type="text" value="Disable"/> ▾

6. Enter the password and configure the access right to manage each module for this account. By default, the access right of a new account is disabled. You can enable it by selecting **Read only** or **Read & Write**.

- **Disable:** This account cannot access this function or enter web manager
- **Read-only:** This account can only view this function, but cannot modify it or enter data.
- **Read & Write:** This account is authorized the full access rights to view, modify, and enter data.

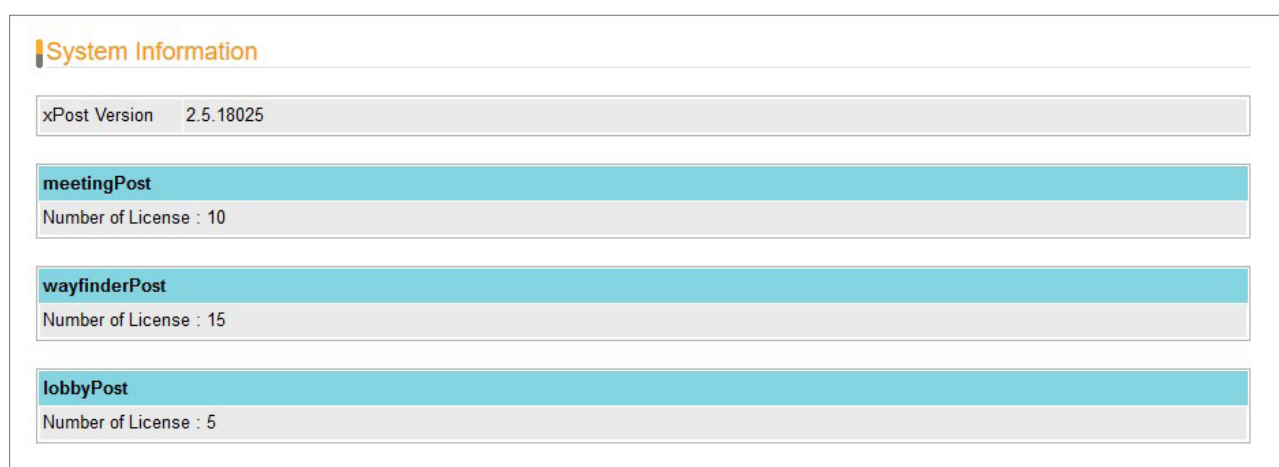

7. After the account is configured, click **Apply** to save and apply changes.

4-2 Software License Management

Normally, you only need to operate License Management once after an xPost is installed. Once you need to change the license number or re-install the xPost, you may need to configure License Management again. Please refer to **2-2 Activate xPost** for detailed operation.

4-3 System Info

You can check xPost version and the license number in the **System Information** page.

The screenshot displays the 'System Information' page with the following data:

System Information	
xPost Version	2.5.18025
meetingPost	Number of License : 10
wayfinderPost	Number of License : 15
lobbyPost	Number of License : 5

5. meetingPost Module

CAYIN's meetingPost is dedicated to the needs of meeting rooms and banquet halls that require flexible arrangement on the meeting schedule as well as frequent update on information post. By integrating SMP players with the meeting management function, meetingPost can be used to substitute traditional paper signs and display real-time information of the event on the monitor outside each meeting room/ banquet hall.

meetingPost provides a content editing tool with easy operation workflow comprising the following steps:

STEP 1: Login meetingPost

STEP 2: Set Up a Meeting Room Display

STEP 3: Modify Template Settings

STEP 4: Connect meetingPost to SMP Player

STEP 5: Arrange Meetings (data entry)

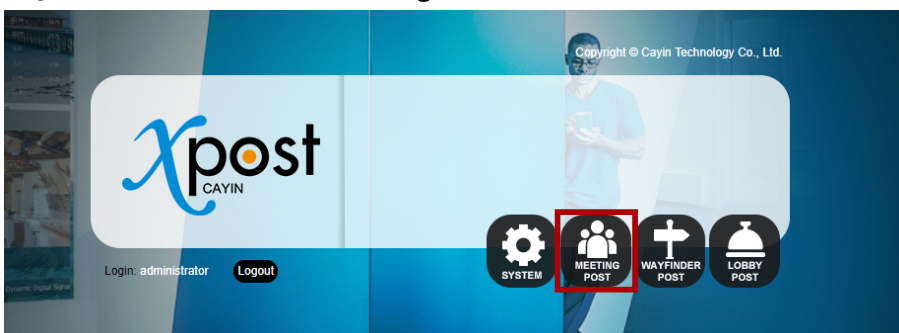

Step 2 to 4 only have to be done on the first-time use. For daily maintenance, users only need to do the 1st and 5th step for data entry.

5-1 Login meetingPost

You can enter meetinPost via the following two methods:

Method 1:

Login xPost and then click **meetingPost** on the main menu.

Method 2:

If you are already in the Web Manager of xPost, you can switch to meetingPost from the upper side toolbar.

5-2 Set Up a Meeting Room Display

To use meetingPost, you must set up a display for a meeting room; then, select and edit a template for it.

5-2-1 Add a Meeting Room

1. Select **Display** on the toolbar and you will see the page of **Meeting Rooms**.

2. In the **Meeting Rooms** page, click **Add** to add a new meeting room. Fill in the **Room's Name** and an optional **Note** field.

3. After all rooms are set, click **Apply** to save the changes.

NOTE

The number of meeting rooms you create here is limited by the license you purchase. You cannot create more rooms than the license. If you need to use meetingPost for more rooms, please purchase more licenses.

5-2-2 Apply a Template

1. Click on the edit button of **Command** on the right-hand side of the specific meeting room which you want to edit.

2. In the **Select Template** page, you can choose a template from pre-loaded templates, and click **Apply** to confirm your selection. For each template, you can see preview and information on this page.

Google

Hi Cayin
xxxxx@gmail.com

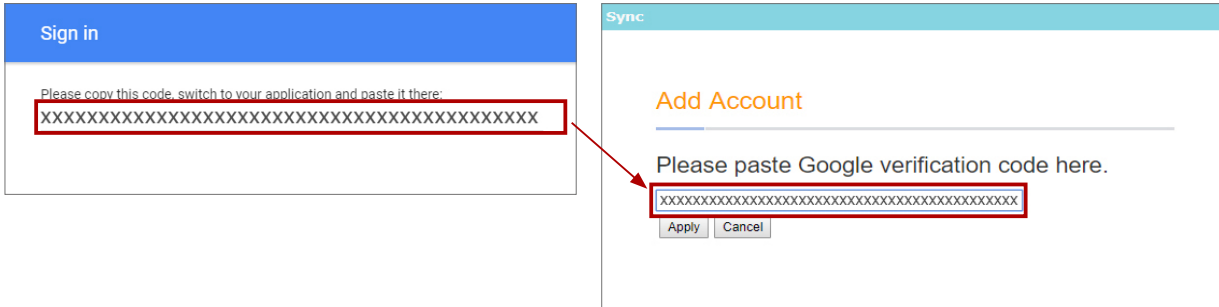

xPost wants to

 View your calendars

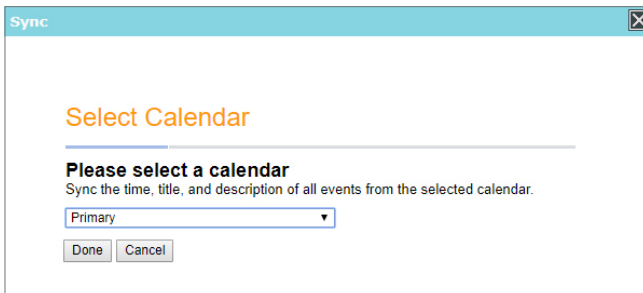

Allow xPost to do this?

By clicking Allow, you allow this app to use your information in accordance to their terms of service and privacy policies. You can remove this or any other app with access to your account in My Account

5. Now, the system will provide a verification code. Please copy it to the Sync page; then click **Apply**.

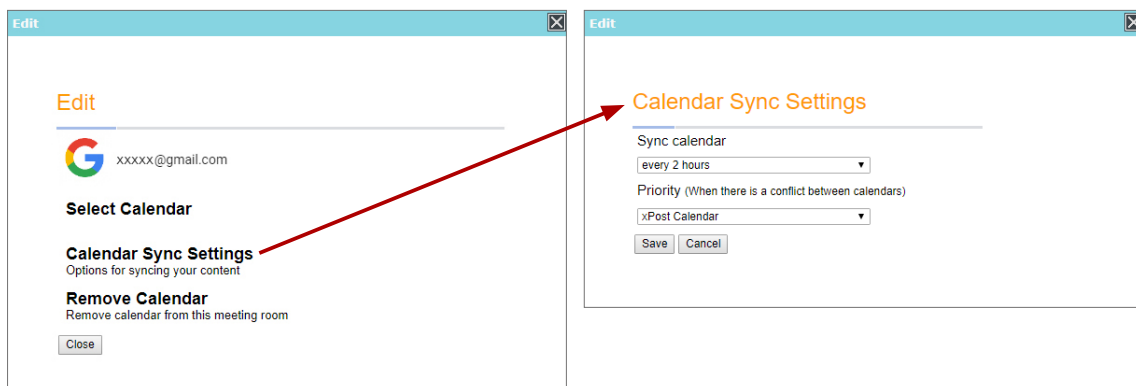

6. Your Google account might manage more than one calendars. Please select one and click **Done**.

7. Now you will see sync info after you build the connection successfully. You can pick your own event color here.

8. If you want to adjust settings, just click . You can select a different calendar, change the sync frequency, set the priority, or remove Google Calendar. Once you remove Google Calendar, all meetings synced from Google Calendar will be deleted from xPost calendar, while all data entered directly on meetingPost will remain unchanged.

9. Select **Calendar** on the toolbar and you will find the synced data show up on the calendar with a dot. The dot color will be the same color you pick earlier.

The screenshot shows the xPost Digital Signage System interface. The top navigation bar includes the xPost logo, user information (Login: administrator), and various menu items: Menu, Calendar (highlighted with a red box), Display, Master, Change Password, and Logout. There are also dropdown menus for 'meetingPost' and 'English'. Below the navigation bar, the 'Calendar' section is active, showing a monthly view for March 2018. The calendar grid has columns for Sun, Mon, Tue, Wed, Thu, Fri, and Sat. A meeting event is visible on Tuesday, March 6th, from 18:00 to 19:00, marked with a blue dot and highlighted with a red box. The interface also includes navigation buttons for '<<', '<', 'Today', '>', '>>', and buttons for 'Import' and 'New Event'.

NOTE

xPost only synchronizes event info with Google Calendar. The synced data on xPost calendar is read-only and CANNOT be edited or deleted on xPost. If you want to make any changes, please use Google Calendar to edit the synced data.

5-5 Set Up a Master Schedule

If you want to show meeting information of more than one meeting rooms on a screen, you can set up a master schedule. Then, the screen will show all meetings scheduled to be held today in these meeting rooms.

1. Select **Master** on the toolbar; then you will see the page of **Master Schedule**.

2. Click **Add** to add a new schedule. Fill in the **Schedule Name** and an optional **Note** field.

Master Schedule

Index	*Schedule name	Note	URL for SMP's playlist	Command	Delete

You can modify or remove the event by clicking the **Edit** or **Delete** button.

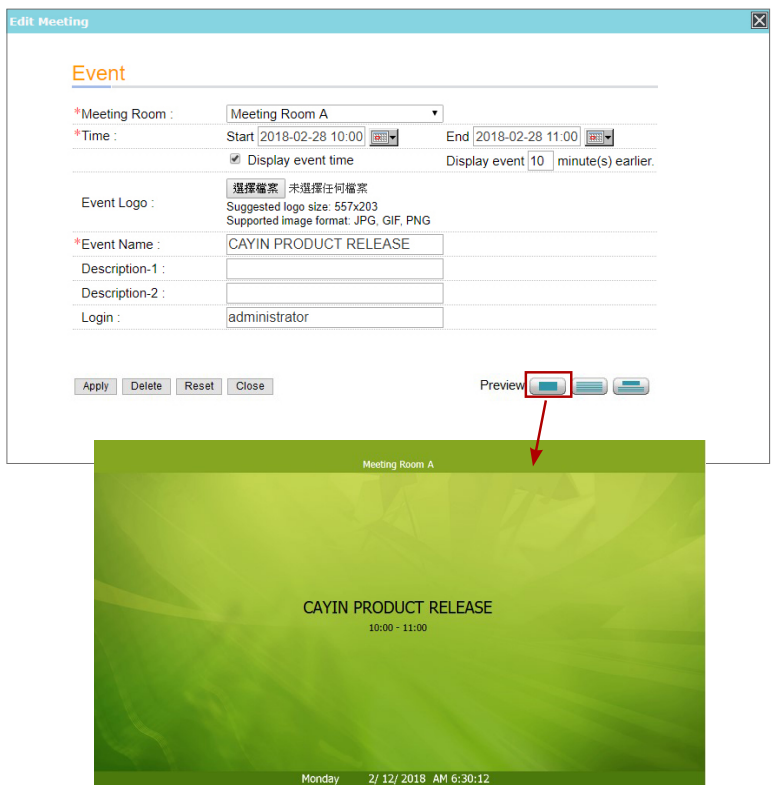

NOTE

You can edit events in the past, but the meeting time must be changed to present or future time.

NOTE

Administrator can edit all events while other users can only edit events which are created by themselves.

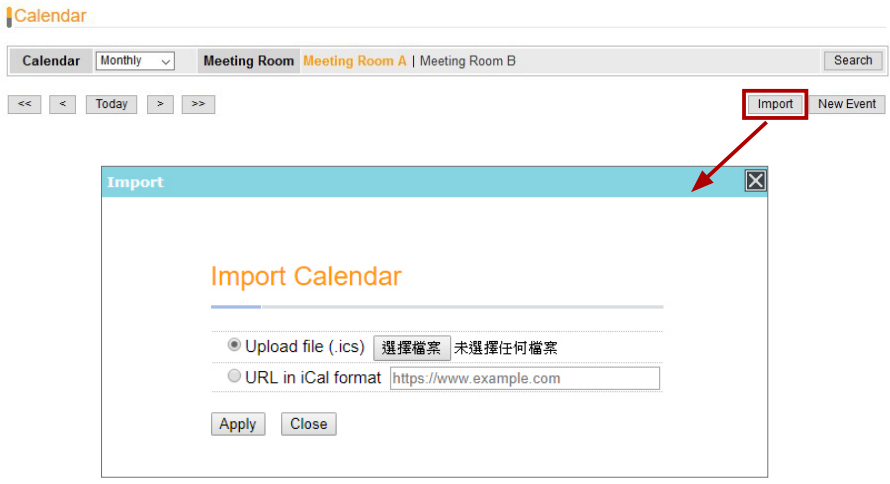

7. If you want to know more about an event, please click the item. Then, you can see details about the event or even edit it in the pop-up window. You can also see the screen preview of the selected event in three modes by clicking the **Preview** button: Meeting, Table, and Mixed.

8. The event will be shown on the screen of the meeting room when it is due to start.

5-7-2 Import Calendar File

Simply go to the **Calendar** page and click **Import** if you want to import events from an **.ics** file into xPost calendar. You can also link to an URL in **iCal** format.

6. wayfinderPost Module

wayfinderPost is application software that CAYIN especially develops for public spaces where conveying announcements, promoting events, and guiding directions are crucial and changed frequently. By integrating SMP players with wayfinderPost, wayfinding displays can present dynamic public announcements and direction guidance more easily.

wayfinderPost provides a content editing tool with easy operation workflow comprising the following five steps:

STEP 1: Login wayfinderPost

STEP 2: Set Up a wayfinding Display

STEP 3: Modify Template Settings

STEP 4: Connect wayfinderPost to SMP Player

STEP 5: Enter wayfinderPost Data

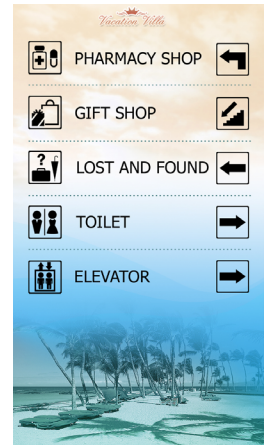

Step 2 to 4 only have to be done on the first-time use. For daily maintenance, users only need to do the 1st and 5th step for data entry.

6-1 Login wayfinderPost

You can enter wayfinderPost via the following two methods:

Method 1:

Login xPost and then click **wayfinderPost** on the main menu.

Method 2:

If you are already in the Web Manager of xPost, you can switch to wayfinderPost from the upper side toolbar.

6-2 Set Up a Wayfinding Display

To use wayfinderPost, you must set up a display first, and then select and edit a template for it.

6-2-1 Add a Display

1. Select **Display** on the toolbar; then you will see the page of **Display**.

2. In the **Display** page, click **Add** to add a new display. Fill in the **Display Name** and an optional **Note** field.

Display

Number of license : 15

Index	*Display name	Note	URL for SMP's playlist	Template	X Delete
NEW.	<input type="text" value="DISPLAY-1"/>	<input type="text" value="1F Main Entrance"/>			<input type="checkbox"/>

3. After all rooms are set, click **Apply** to save the changes.

NOTE

The number of displays you create here is limited by the license you purchase. You cannot create more displays than the license. If you need more displays, please purchase more licenses.

6-2-2 Apply a Template

1. Click on the edit button of **Template** on the right-hand side of the specific display which you want to edit.

2. In the **Select Template** page, you can choose a template from pre-loaded templates, and click **Apply** to confirm your selection. For each template, you can see preview and information on this page.

- **Type:** Each template contains 1 or 2 types of presentation.
 - **Table of places:** Show multiple rows of data in a table.
 - **Indicator:** Show one set of data only.
- **Display:** Indicate supported display orientation, **Horizontal** (landscape) or **Vertical** (portrait).
- **Resolution:** Indicate supported display resolutions.

NOTE

The differences between these two types of wayfinderPost templates are indicated as follows:

Table of places

Multiple rows of data in a table
(e.g. Five sets of data. Each set of data includes two images and one description.)

Indicator

One set of data
(e.g. One event with the photo, even name, ballroom name, direction)

6-2-3 Upload a Template

1. Click on the edit button of **Template** on the right-hand side of the specific meeting room which you want to edit. Then, you can go to the **Select Template** page.

2. In the **Select Template** page, click **Browse...** to select a template file and click **Upload**.

Select Template

Meeting Rooms > Select Template

NOTE

Templates must be prepared with suitable programs and adequate testing. Therefore, you can only upload templates provided by CAYIN. Please contact CAYIN's sales representatives if you need the customization service.

6-3 Modify Template (Template Settings)

After you select a template for a display, you can further customize the template. If you do not change settings of template, you still can start to input wayfinding data into the system with the default presentation.

1. Go to **Display** page. (wayfinderPost > Display)

Display

Number of license : 15

Index	*Display name	Note		URL for SMP's playlist	Template	Delete
1.	DISPLAY-1	1F Main Entrance	T	http://172.16.100.126/cayin/wfi/1		<input type="checkbox"/>
2.	DISPLAY-2	2F Main Entrance	I	http://172.16.100.126/cayin/wfi/2		<input type="checkbox"/>

2. For each meeting room, you will see a small icon, **T** or **I**, in front of the URL link. You can click the icon and modify each template design in the **Template Settings** page.

NOTE

You can also click on the edit button on the selected template to enter the **Template Settings** page.

Display

Number of license : 15

Index	*Display name	Note		URL for SMP's playlist	Template	Delete
1.	DISPLAY-1	1F Main Entrance	T	http://172.16.100.126/cayin/wfi/1		<input type="checkbox"/>
2.	DISPLAY-2	2F Main Entrance	I	http://172.16.100.126/cayin/wfi/2		<input type="checkbox"/>

3. You can choose either **Default** or **Advance** settings to modify settings for each template type.

Default

Most of the settings will be kept as the original template design. Few parameters can be edited. Choosing this option can keep the template settings simple and fit the original design.

Template Settings Display > Select Template > Template Settings

Display name : DISPLAY-1

Resolution	1920x1080

Type	Table of places
Logo	<input type="button" value="選擇檔案"/> CAYIN_LOGO.jpg Suggested logo size: 300x50 Supported image format: JPG, GIF, PNG
Number of Row	2

Template layout preview only. This is not the real result on display.

- **Resolution:** Select an appropriate display resolution. You must configure the display settings of SMP player with the same resolution as the template settings here so that the screen can display it properly.
- **Display:** Choose either **Horizontal** (landscape) or **Vertical** (portrait) display type.
- **Type:** Each template may contain one or two types of presentation, **Table of places** and **Indicator**. Please check the **Type** information of each template.
- **Logo:** Upload a logo file for this display.
- **Number of Row** (For the type **Table of places** only): You can set the number of rows per page on the display.

Advance

You can edit most of the template parameters, including changing background and font settings.

- **Resolution, Display, Logo, and Number of Row:** These options are the same as the ones in the **Default** mode.
- **Background:** To replace the template background, you can choose to use a single color, an image, or the default background.

NOTE

xPost DOES NOT support CMYK image format. Please DO NOT upload images files in CMYK format. If you accidentally upload a CMYK image, it may cause some problems. Please contact CAYIN for the solution.

- **Duration of data rotation:** wayfinderPost can automatically rotate pages, in case the data is too much to be fully shown on one page. You can set the duration per page here.

Background	<input type="radio"/> Color <input type="text" value="#ffffff"/>
	<input type="radio"/> Image ↓ template1-1920x1080-h.gif(549 KB) 選擇檔案 未選擇任何檔案 Supported image format: JPG, GIF, PNG

Template layout preview only. This is not the real result on display.

4. After you configured, click **Apply** to confirm the changes.

6-4 Connect wayfinderPost to SMP Player

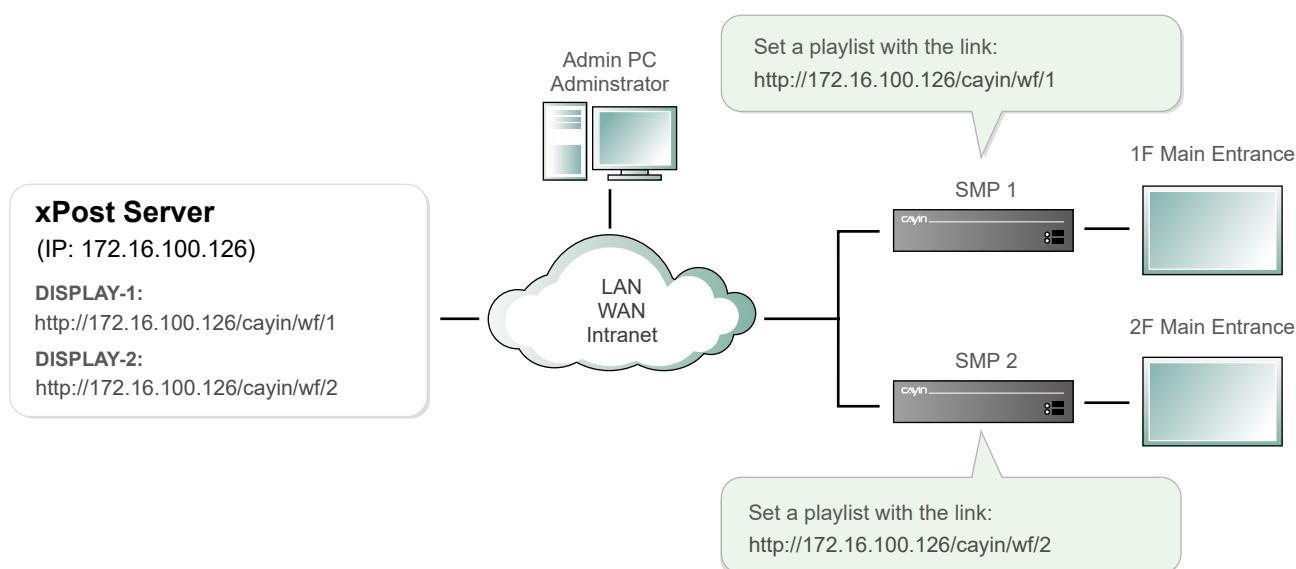

After the display template is selected and modified, please go back to the **Display** page. You can see that each display has one URL. The URL is the link between wayfinderPost and SMP player.

Display

Number of license : 15

Index	*Display name	Note	URL for SMP's playlist	Template	Delete
1.	DISPLAY-1	1F Main Entrance	http://172.16.100.126/cayin/wf/1		<input type="checkbox"/>
2.	DISPLAY-2	2F Main Entrance	http://172.16.100.126/cayin/wf/2		<input type="checkbox"/>

To create a connection between wayfinderPost and an SMP player, you need to copy the correspondent URL shown on the **Display** page and paste into a playlist or a HTML zone of a SMP-NEO series player.

1. Select one of the URLs of one display, and copy it to the clipboard.

Display

Number of license : 15

Index	*Display name	Note	URL for SMP's playlist	Template	Delete
1.	DISPLAY-1	1F Main Entrance	http://172.16.100.126/cayin/wf/1		<input type="checkbox"/>
2.	DISPLAY-2	2F Main Entrance	http://172.16.100.126/cayin/wf/2		<input type="checkbox"/>

NOTE

You may need to modify the IP address of this URL if your network environment is complicated. Please make sure the IP address or domain name can be connected from the SMP player to the xPost server.

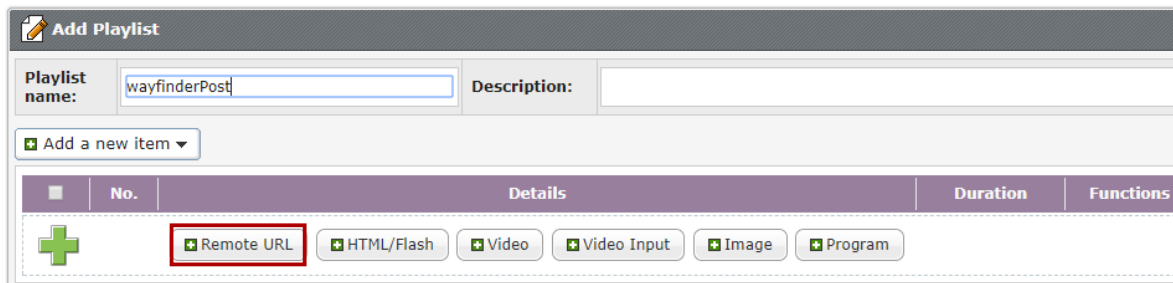

- Open the Web Manager of the SMP player, which controls the screen of this wayfinding display. Click **PLAYBACK > Playback 1** and go to the **Playback 1** page.

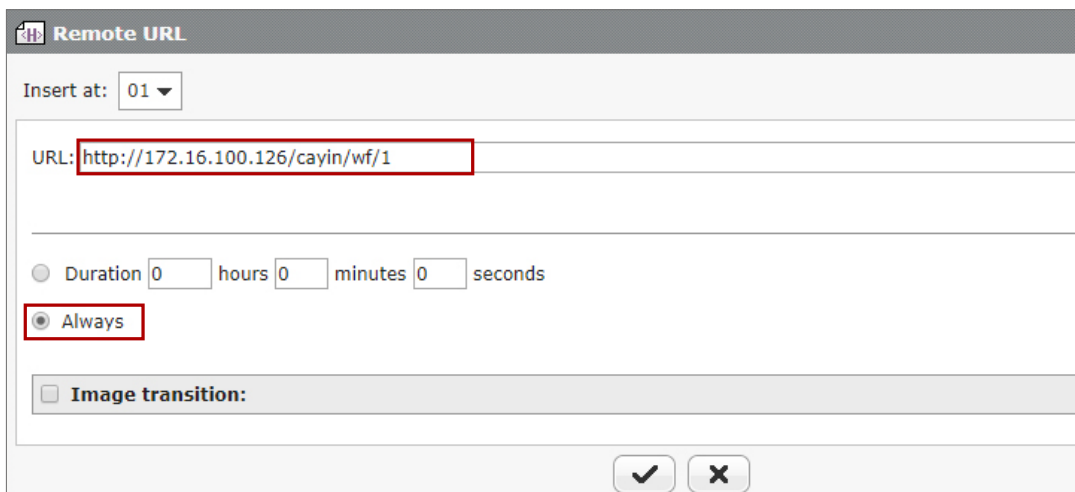

- Click **New** to create a Playlist.

- Enter the playlist name and its description. Then, click **Remote URL** to add a new item.

- Paste the URL (from step 1) to the **URL** field and set duration to **Always**. Then, click .

6. Enable the item.

Add Playlist

Playlist name: wayfinderPost Description:

+ Add a new item ▾

	No.	Details	Duration	Functions
	1	http://172.16.100.126/cayin/wf/1	Always	 

+ Remote URL + HTML/Flash + Video + Video Input + Image + Program

Save Save and play Cancel

7. Click **Save and play**; then you will see the SMP player start to play the playlist and show the template on the screen.

6-5 Enter wayfinderPost Data

After you finish configuring the display, you can start to input data into wayfinderPost.

1. Select **Data** on the toolbar; then you will see the page of **Data**.

2. If you have more than one wayfinding display, you need to switch to the right display by clicking on the display name.

3. In the page of **Data**, there are two data sources of wayfinderPost module:

- **Enter wayfinder data manually:** Enter data row by row manually.
- **Retrieve data from meetingPost:** wayfinderPost can import event data from meetingPost automatically after configured.

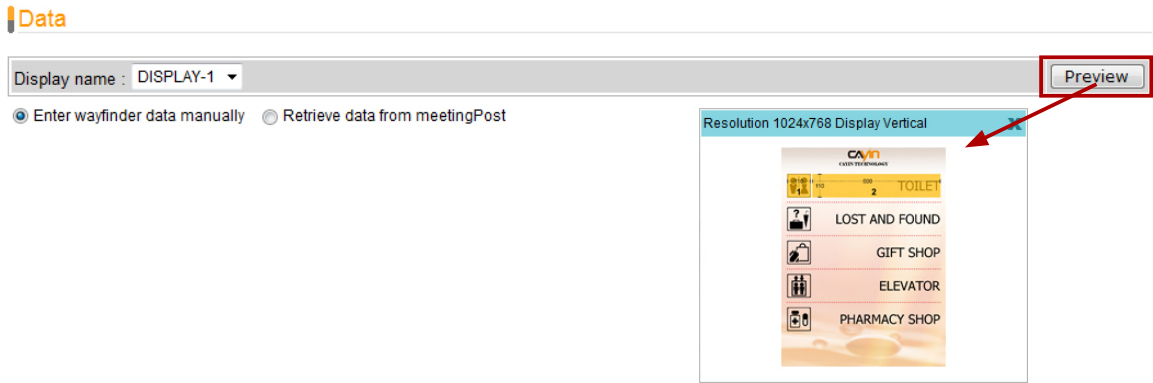

We will introduce these two data sources in the following sections.

6-5-1 Enter wayfinder Data Manually

1. Select **Enter wayfinder data manually**.

2. Click **Preview**; then you can check the template which you apply to this display. The preview can remind you about the final presentation of the display and also the columns of data which you should enter on the **Data** page.

3. On the preview picture, you can see the selected template with number on it. The numbers indicate the column on the **Data** page. (e.g. 1 means the first column).

NOTE
 If you cannot see the preview clearly, you can also click on the preview image and download a full-size picture of the preview that indicates the template and the size for each field.

4. The first blue row of the table indicates the title of each column. The title is for your reference and may not be shown on the display. Please check the template style to make sure if the title will be shown on the final presentation.

You can enable/disable data column. If you only need to show two columns, please tick the checkbox of the first two columns, and leave others unchecked.

5. Click **Add** to add a new data record. For each row, you can choose to enter **Texts**, **Pictures**, or **Flash**.

7. You can optionally choose one extra pictures for each meeting room, such as the arrow pointing the direction of that meeting room.

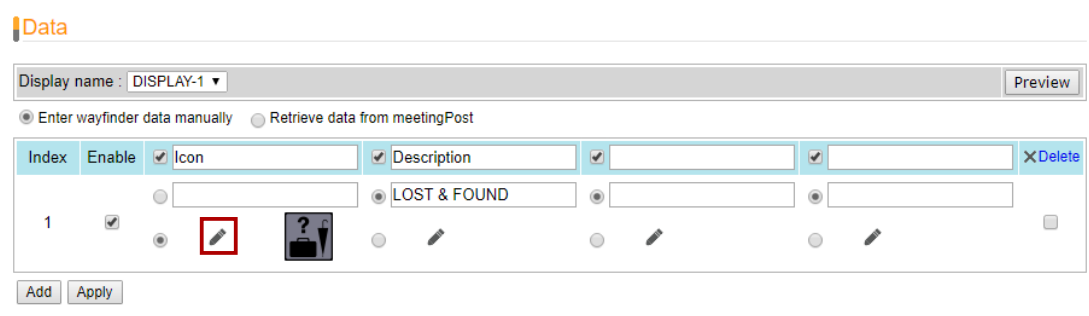

8. Click **Apply** after you finish the configuration.

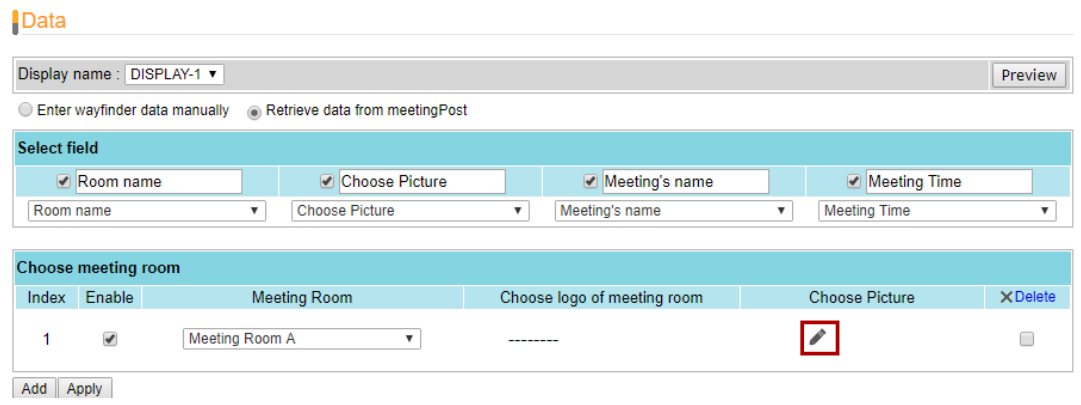

6-5-3 Upload Your Own Icons

1. Go to one of the following pages and click .

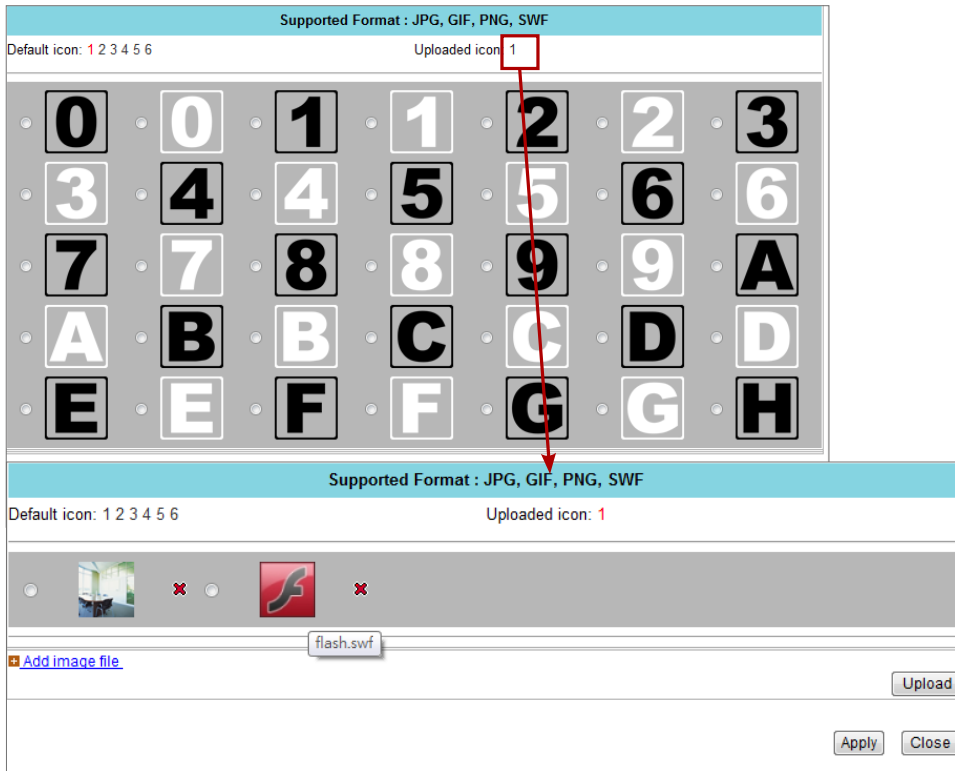

Enter wayfinder data manually

Retrieve data from meetingPost

2. Click the number beside **Uploaded icon**: Then, you will see a pop-up window. Click **Add image file**, select a file, and click **Upload**. Then, the uploaded images will be listed here for your choice.

NOTE

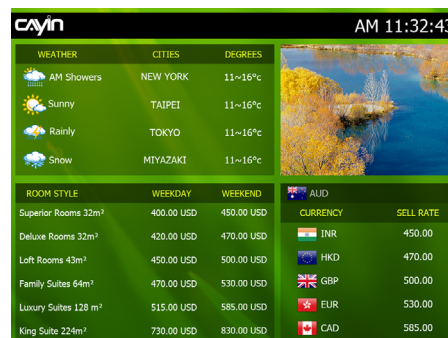

xPost DOES NOT support CMYK image format. Please DO NOT upload images files in CMYK format. If you accidentally upload a CMYK image, it may cause some problems. Please contact CAYIN for the solution.

NOTE

Flash file can't be previewed. However, you can see the file name for your reference when you move your mouse over the Flash icon.

7. lobbyPost Module

CAYIN lobbyPost is application software especially designed for lobby digital signage, such as for administrators of hotel and convention center to communicate with guests in lobbies. Powered by lobbyPost's content and managerial tools, the software, incorporating with CAYIN SMP players, can be used to easily display advertisements, room types and tariff, currency exchange rate, weather and more information.

The screenshot shows the CAYIN lobbyPost interface with the following data:

WEATHER	CITIES	DEGREES	AUD	
AM Showers	NEW YORK	11~16°C	INR	450.00
Sunny	TAIPEI	11~16°C	HKD	470.00
Rainly	TOKYO	11~16°C	GBP	500.00
Snow	MIYAZAKI	11~16°C	EUR	530.00
			CAD	585.00

ROOM STYLE	WEEKDAY	WEEKEND	AUD

Family Suites 64m ²	470.00 USD	530.00 USD	EUR	530.00
Luxury Suites 128 m ²	515.00 USD	585.00 USD	CAD	585.00
King Suite 224m ²	730.00 USD	830.00 USD		

lobbyPost provides a content editing tool with easy operation workflow comprising the following five steps:

STEP 1: Login lobbyPost

STEP 2: Set Up a Lobby Display

STEP 3: Modify Template Settings

STEP 4: Connect lobbyPost to SMP Player

STEP 5: Enter lobbyPost Data

Step 2 to 4 only have to be done on the first-time use. For daily maintenance, users only need to do the 1st and 5th step for data entry.

7-1 Login lobbyPost

You can enter lobbyPost via the following two methods:

Method 1:

Login xPost and then click **lobbyPost** on the main menu.

Method 2:

If you are already in the Web Manager of xPost, you can switch to lobbyPost from the upper side toolbar.

7-2 Set Up a Lobby Display

To use lobbyPost, you must set up a display first, and then select and edit a template for it.

7-2-1 Add a Display

1. Select **Display** on the toolbar; then you will see the page of **Display**.

2. In the **Display** page, click **Add** to add a new display. Fill in the **Display Name** and the optional **Note** field.

Display

- **▶▶** : Click the arrow and preview different resolutions and display types of this template.
- **Areas:** Each template contains at most six areas for a variety of combinations of room type and tariff, currency exchange, weather information, images, Flash, video, and ticker. You can follow the pre-configured usages or modify the data type of each area to create your own ideal lobby display.
- **Display:** Indicate supported display orientation, **Horizontal** (landscape) or **Vertical** (portrait).
- **Resolution:** Indicate supported display resolutions.

7-2-3 Upload a Template

1. Click on the edit button of **Template** on the right-hand side of the specific display which you want to edit. Then, you can go to the **Select Template** page.

ite	URL for SMP's playlist	Template	✕ Delete
rance			<input type="checkbox"/>
rance			<input type="checkbox"/>
ance			<input type="checkbox"/>

2. In the **Select Template** page, click **Browse...** to select a template file and click **Upload**.

NOTE

Templates must be prepared with suitable programs and adequate testing. Therefore, you can only upload templates provided by CAYIN. Please contact CAYIN's sales representatives if you need the customization service.

7-3 Modify Template (Template Settings)

After you select a template for a lobby display, you can further customize the template. If you do not change settings of template, you still can start to input data into the system with the default presentation.

1. Go to **Display** page. (lobbyPost > Template)

Display

Number of license : 5

Index	*Display name	Note	URL for SMP's playlist	Template	✕Delete

Weather, Room & Tariff, and Currency Settings

LOBBY-1

Area 3 : Weather

Number of Row:

Duration of data rotation: second(s)

Title: Color Font face Font size

Data: Color Font face Font size

Area 6 : Currency

Number of Row:

Duration of data rotation: second(s)

Title: Color Font face Font size

Data: Color Font face Font size

Area 5 : Room & tariff

Number of Row:

Duration of data rotation: second(s)

Title: Color Font face Font size

Data: Color Font face Font size

- **Number of Row:** Specify how many rows you would like to show on the screen at a time.
- **Duration of data rotation:** Specify how long one page of the data will display on the screen.
- **Title, Data:** Modify the font color, type, and size of the texts of Title and Data.

EXAMPLE

You want to show the weather information of totally 15 cities, but you only have limited space on this area. You can set **Number of Row** as 5 and 10 seconds for the duration. Then, the weather information will be divided into 3 pages, and each of them will show information of 5 cities. The screen will rotate these 3 pages every 10 seconds.

Image Slideshow Settings

LOBBY-1

Area 3 : Image Slideshow (1)

Duration: second(s)

- **Duration:** Specify the duration of playing each image.

Video Settings

LOBBY-1

<input type="checkbox"/> Area 4 : Video	
Display ratio	<input checked="" type="radio"/> Auto <input type="radio"/> 16:9 <input type="radio"/> 4:3
<input type="button" value="Apply"/>	

- Display ratio: Specify the ratio of video showing on the screen.

If you choose **Auto**, video will be shown based on the ratio of this selected area. If you play a video with ratio 4:3 in an area with ratio 16:9, you can select 4:3 to keep the video in the original ratio.

Ticker Settings

LOBBY-1

<input type="checkbox"/> Area 6 : Ticker (1)	
Text Color	<input type="text" value="#000000"/> <input type="button" value="Color Picker"/>
Font face	<input type="text" value="Tahoma"/> <input type="button" value="Font"/>
Font size	<input type="text" value="20"/> px
Direction	<input type="radio"/> Static <input checked="" type="radio"/> Left <input type="radio"/> Right <input type="radio"/> Up <input type="radio"/> Down
Speed	<input type="text" value=""/> <input type="text" value=""/> <input type="text" value=""/> <input type="text" value=""/> (Fast)
<input type="button" value="Apply"/> <input type="button" value="Close"/>	

- **Text Color, Font Face, Font Size:** Modify the settings of the texts.
- **Direction:** Define the direction of the ticker. If you select **Left**, the texts will move from right to left.
- **Speed:** Adjust the moving speed of the ticker.

4. After you configured, click **Apply** to confirm the changes.

7-4 Connect lobbyPost to SMP Player

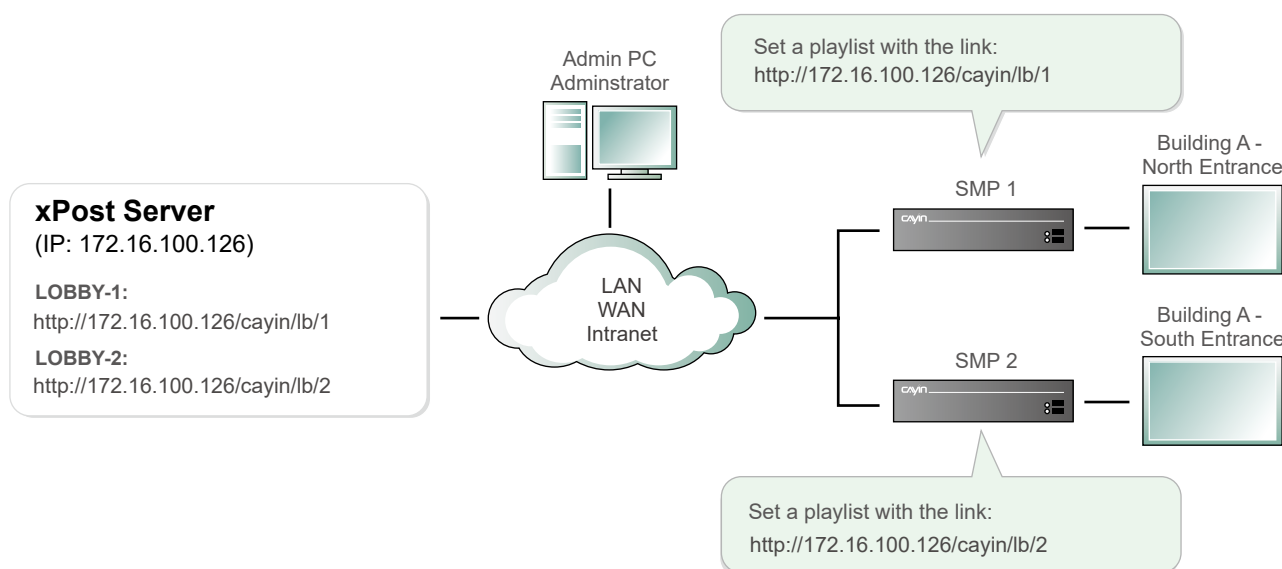

After the display template is selected and modified, please go back to the **Display** page. You can see that each display has one URL. The URL is the link between lobbyPost and SMP player.

Display

Number of license : 5

Index	*Display name	Note	URL for SMP's playlist	Template	Delete
1.	LOBBY-1	Building A - North Entrance	http://172.16.100.126/cayin/lb/1		<input type="checkbox"/>
2.	LOBBY-2	Building A - South Entrance	http://172.16.100.126/cayin/lb/2		<input type="checkbox"/>
3.	LOBBY-3	Building B - Main Entrance	http://172.16.100.126/cayin/lb/3		<input type="checkbox"/>

To create a connection between lobbyPost and an SMP player, you need to copy the correspondent URL shown on the **Display** page and paste into a playlist or a HTML zone of a SMP-NEO series player.

1. Select one of the URLs of one display, and copy it to the clipboard.

Display

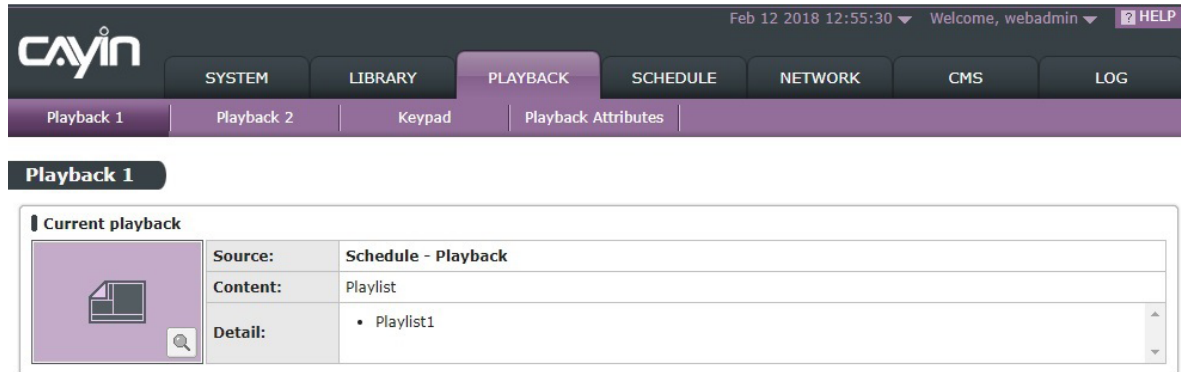

Number of license : 5

Index	*Display name	Note	URL for SMP's playlist	Template	Delete
1.	LOBBY-1	Building A - North Entrance	http://172.16.100.126/cayin/lb/1		<input type="checkbox"/>
2.	LOBBY-2	Building A - South Entrance	http://172.16.100.126/cayin/lb/2		<input type="checkbox"/>
3.	LOBBY-3	Building B - Main Entrance	http://172.16.100.126/cayin/lb/3		<input type="checkbox"/>

NOTE

You may need to modify the IP address of this URL if your network environment is complicated. Please make sure the IP address or domain name can be connected from the SMP player to the xPost server.

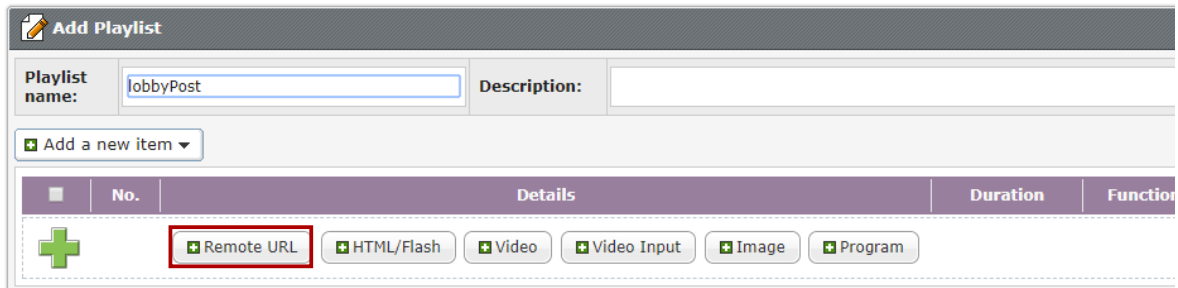

- Open the Web Manager of the SMP player, which controls the screen of this wayfinding display. Click **PLAYBACK > Playback 1** and go to the **Playback 1** page.

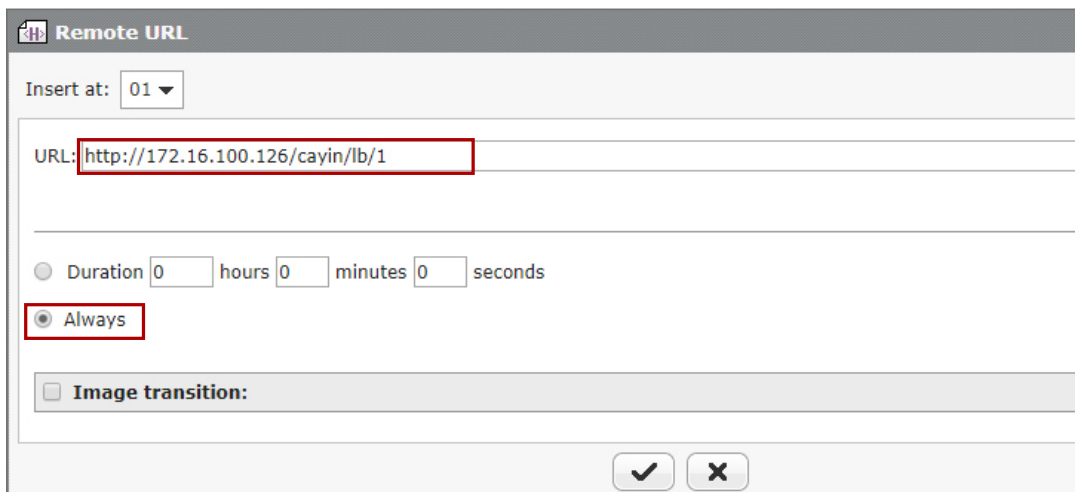

- Click **New** to create a Playlist.

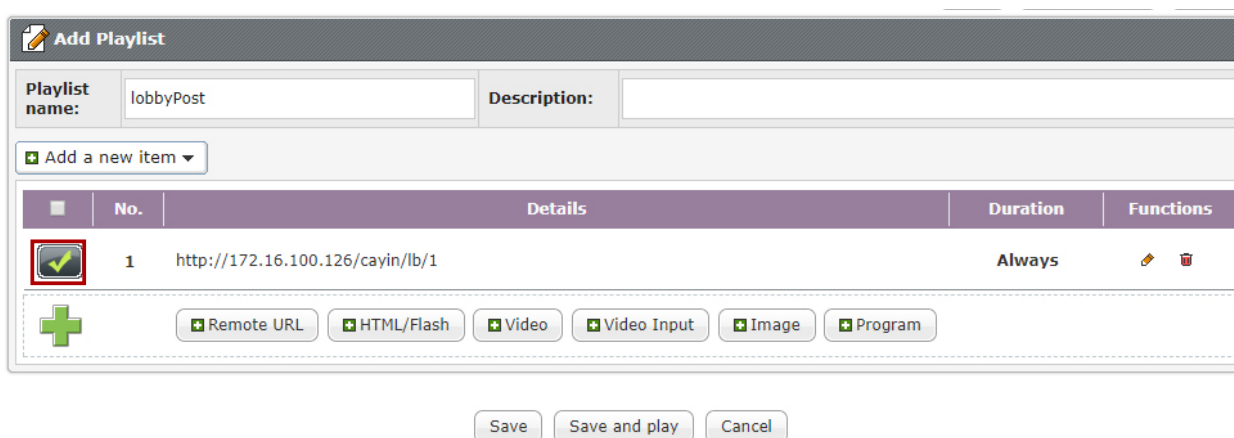

- Enter the playlist name and its description. Then, click **Remote URL** to add a new item.

- Paste the URL (from step 1) to the **URL** field and set duration to **Always**. Then, click .

6. Enable the item.

7. Click **Save and play**; then you will see the SMP player start to play the playlist and show the template on the screen.

7-5 Enter lobbyPost Data

After you finish configuring the display, you can start to input data into lobbyPost.

In lobbyPost, there are several different types of data. In general, you can categorize them into two types:

1. **Table type:** All data are arranged in a table. Please note that the following three types of data will be shared by all lobby displays. You cannot apply different data to different lobby displays.
 - i. **Room & Tariff:** Enter the name, tariff and related information of guest rooms.
 - ii. **Currency Exchange:** Select country, currency and related information.
 - iii. **Weather:** Enter weather information manually or automatically.
2. **Non-Table type:** The content in this category is not arranged in a table. Most of them are multimedia files.
 - i. **Ticker 1 & 2:** Text messages
 - ii. **Flash 1 & 2:** Flash area
 - iii. **Logo:** Logo image
 - iv. **Clock:** Clock made by Flash

v. **Video**: Play video files in SMP player

vi. **Image Slideshow 1 & 2**: Image slideshow function

We will introduce each data type in the following sections.

7-5-1 Room & Tariff

Setup Room & Tariff data, you must select appropriate fields and enter your room information accordingly.

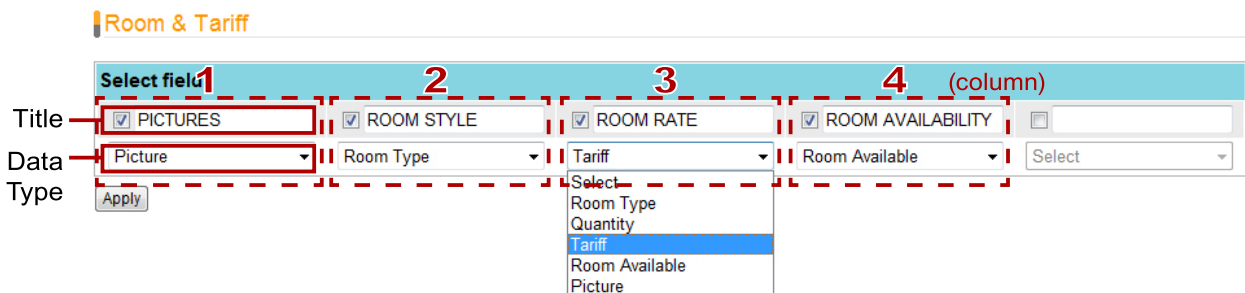

1. Select **Data > Room & Tariff** on the toolbar; then you will see the page of **Room & Tariff**.

2. **Select field**: The fields selected here will be shown on the screen in left-to-right order.

Enter field title and enable this column by clicking on the checkbox right beside the title. For Room & Tariff, you can show maximum five columns of data. The title may be shown on the screen based on your selected template. Please check the template style to make sure if the title will be shown on the final presentation.

Please match the appropriate type to each field (column), so that the data will be shown correctly in the table on the screen. After configuration, please click **Apply**.

3. **Add Room & Tariff:** After the fields are set, click **Add** to add rooms and related information.

Room & Tariff

4	<input checked="" type="checkbox"/>		Royal Villa	USD 530.00	<input checked="" type="radio"/> Yes <input type="radio"/> No	<input type="checkbox"/>

- **Picture:** Upload picture images.

NOTE
 xPost DOES NOT support CMYK image format. Please DO NOT upload images files in CMYK format. If you accidentally upload a CMYK image, it may cause some problems. Please contact CAYIN for the solution.

- **Room Type, Quantity, & Tariff:** These three data types are text fields. After defining the title and data type for each column, you can fill in the data here.
- **Room Availability:** Boolean value. Show visitors whether these rooms are available or not. You can further click on the title to change the message to your own language.

4. After the rooms are set, click **Apply** to confirm the changes.

7-5-2 Currency Exchange

You can choose to enter the exchange rate data manually or retrieve data from a remote URL.

Enter data manually

1. Select **Data > Currency Exchange** on the toolbar; then you will see the page of **Currency Exchange**.

2. Select a base currency using the scrolling selection boxes. You can enter the message your want for the base currency.

3. **Select field:** The fields selected here will be shown on the screen in left-to-right order.

Enter field title and enable this column by clicking on the checkbox right beside the title. For **Currency Exchange**, you can show maximum three columns of data, which are **currency (country)**, **buy**, and **sell**. The title may be shown on the screen based on your selected template. Please check the template style to make sure if the title will be shown on the final presentation.

Please match the appropriate type to each field (column), so that the data will be shown correctly in the table on the screen. After configuration, please click **Apply**.

4. Choose **Enter data manually**, and click **Add** to add the target country (currency) and enter data. lobbyPost supports to display national flags. You only need to select a country and its national flag will be displayed automatically. If you do not want to show national flags on the screen, please click **Hide country flag**.

Enter exchange rate						
Index	Enable	<input type="checkbox"/> Hide country flag	Currency	Rate	X Delete	
1	<input checked="" type="checkbox"/>		Japan	JPY	104.28	<input type="checkbox"/>

7-5-3 Weather

1. Select **Data > Weather** on the toolbar; then you will see the page of **Weather**.

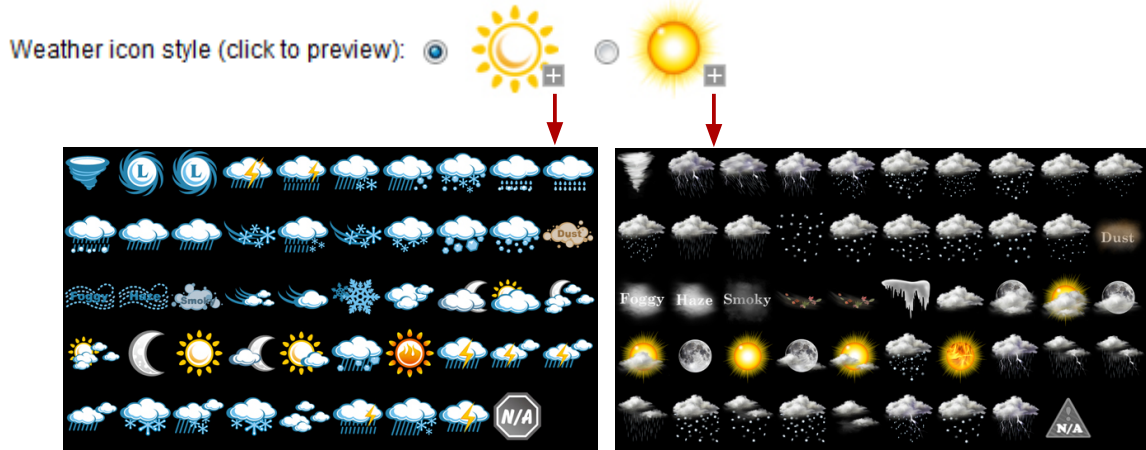

2. **Select field:** The fields selected here will be shown on the screen in left-to-right order.

Enter field titles and enable these columns by clicking on the checkbox right beside the titles. For **Weather**, you can show maximum four columns of data, which are **city**, **weather & icon**, **Temperature**, and **Notes**. The titles may be shown on the screen based on your selected template. Please check the template style to make sure if the titles will be shown on the final presentation.

Please match the appropriate type to each field (column), so that the data will be shown correctly in the table on the screen. After configuration, please click **Apply**.

3. We provide two styles of weather icon. You can click + to see all icons of each style and select one.

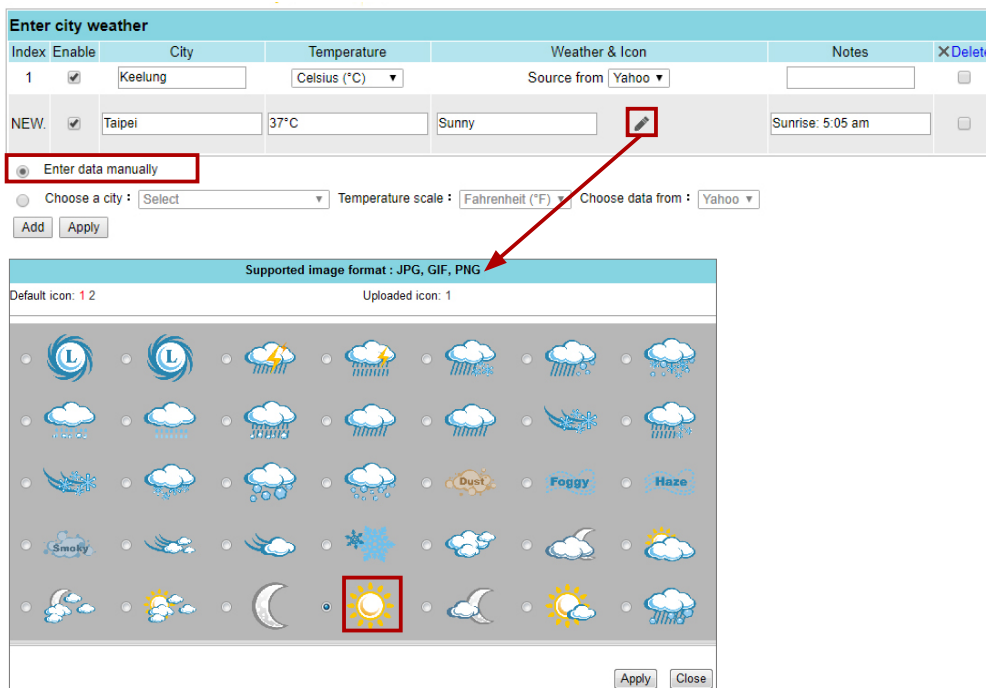

4. After all fields are set, you can start to enter data. There are two options for you to enter weather information: **Enter data manually** and **retrieve data automatically from the Internet**.

Enter data manually

Select **Enter data manually**. Then, click **Add** to add information.

- **City, Temperature, Weather, Notes:** You can enter texts here.
- **Icon:** Click and you will see a pop-up window. Choose a suitable icon and click on the image.

Retrieve data automatically from the Internet

Enable **Choose a city**. After you select a city, a temperature scale, and a data source, please click **Add** to add information.

Enter city weather

Index	Enable	City	Temperature	Weather & Icon	Notes	X Delete
<input type="radio"/> Enter data manually						
<input checked="" type="radio"/> Choose a city : Berlin Temperature scale : Celsius (°C) Choose data from : Yahoo						
<input type="button" value="Add"/> <input type="button" value="Apply"/>						

- **City and Notes:** These are texts. You can change manually.
- **Temperature, Weather & Icon:** This information will be retrieved automatically from Yahoo.

Enter city weather

Index	Enable	City	Temperature	Weather & Icon	Notes	X Delete
1	<input checked="" type="checkbox"/>	Berlin	Celsius (°C)	Source from Yahoo		<input type="checkbox"/>
2	<input checked="" type="checkbox"/>	London	Celsius (°C)	Source from Yahoo		<input type="checkbox"/>
3	<input checked="" type="checkbox"/>	Taipei	Fahrenheit (°F)	Source from Yahoo		<input type="checkbox"/>
<input type="radio"/> Enter data manually						
<input checked="" type="radio"/> Choose a city : Select Temperature scale : Fahrenheit (°F) Choose data from : Yahoo						
<input type="button" value="Add"/> <input type="button" value="Apply"/>						

5. Click **Apply** after you confirm the changes.

NOTE
If you choose **Retrieve data online**, you must make sure the xPost server connect to Internet properly.

If you don't see the city you want in the drop-down list, you can add a new city by yourself.

1. Select **"Add a new city"**. Then, you will see a pop-up window.

Weather icon style (click to preview):

Enter city weather

Index	Enable	City	Temperature	Weather & Icon	Notes	X Delete
<input type="radio"/> Enter data manually						
<input checked="" type="radio"/> Choose a city : Select Temperature scale : Fahrenheit (°F) Choose data from : Yahoo						
<div style="border: 1px solid #00AEEF; padding: 5px; margin-top: 5px;"> Select Add a new city Adelaide Amsterdam Atlanta Bangalore Bangkok Barcelona Bern Beijing Belo Horizonte Berlin Bilbao Birmingham Bologna Boston </div>						

2. Fill in the country name, city name and the city ID. Please refer to **Appendix C** to check the **city ID**.

City list

Country	City Name	City's ID	X Delete
<input type="button" value="Apply"/>			

Add a new city

Country	City Name	City's ID
<input type="text" value="United States"/>	<input type="text" value="Las Vegas"/>	<input type="text" value="2436704"/>

3. After you complete settings, click **Apply**. Then, you can see the city name in the drop-down menu.

Weather icon style (click to preview):  

Enter city weather

Index	Enable	City	Temperature	Weather & Icon	Notes	X Delete	
<input type="radio"/> Enter data manually							
<input checked="" type="radio"/> Choose a city :							
<input type="button" value="Add"/> <input type="button" value="Apply"/>		<div style="border: 1px solid #ccc; padding: 2px;"> Select <ul style="list-style-type: none"> Johannesburg Kaohsiung Kolkata (Calcutta) Kraków Kuala Lumpur Las Palmas de Gran Canaria <li style="border: 2px solid red;">Las Vegas Leeds Lima London Los Angeles Lyon Madrid Málaga Manila Marseille Melbourne Mexico City Miami Milan </div>	Temperature scale : <input type="text" value="Fahrenheit (°F)"/>	Choose data from : <input type="text" value="Yahoo"/>			

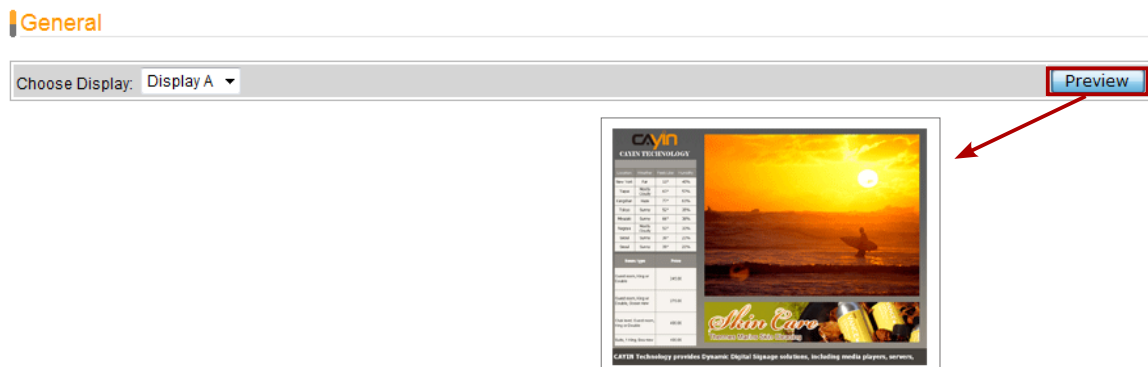

7-5-4 General and Image Slideshow

For all **Non-Table** type data, every display has its own settings. You must configure the information individually for each display.

Select **Data > General or Image Slideshow** on the toolbar; then you will see the respective page.

Then, select display from the menu first. You can click **Preview** to see the template applied to this display. When you click on the preview image, you can download the 1:1 image to your computer, so that you can see the size of each zone clearly.

Ticker message

You can choose to Euse RSS feed of enter text messages here directly.

Ticker (1) & Ticker (2)	
Ticker (1)	<input checked="" type="radio"/> Text <input type="radio"/> RSS Feed
	<input type="text" value="http://"/> <input type="text" value="http://"/>
Ticker (2)	<input checked="" type="radio"/> Text <input type="radio"/> RSS Feed
	<input type="text" value="http://"/> <input type="text" value="http://"/>

Flash

Click **Browse...** and upload you own Flash (.swf) file.

Flash (1) & Flash (2)	
Flash (1)	<input type="text" value="logo.swf (16 KB)"/> <input type="button" value="浏览..."/>
Flash (2)	<input type="text" value="banner.swf (105 KB)"/> <input type="button" value="浏览..."/>

Logo

Upload a logo image (jpg, gif, or png).

Logo

Logo

Supported image format: JPG, GIF, PNG

NOTE

xPost DOES NOT support CMYK image format. Please DO NOT upload images files in CMYK format. If you accidentally upload a CMYK image, it may cause some problems. Please contact CAYIN for the solution.

Clock

Select the default, pre-loaded clock, or upload your own clock (format: .swf)

Clock

Video

You can choose to play video files or streaming video (RTP/RTB/HTTP/MMS). If you want to play video files, please upload files in the **video** folder of SMP's Media Folder. For multiple video files, you can add ";" to separate each file, and SMP player will playback video files in the same order you configure here.

Type	Settings
Folder	video/
File	video/1.mpg;video/3.mpg (SMP will playback video files in the same order you configure here.)
Streaming	mms://ip_address/mms_url http://ip_address/http_url rtb://port rtb://multi_cast_ip:port rtp://port rtp://multi_cast_ip:port

Video Path	
Video	video/1.mpg;video/2.mpg;video/3.mpg

Video Path	
Video	mms://192.168.1.1/mms_url

NOTE

We suggest you don't mix video files and streaming in this function.

Image Slideshow

Upload image files (jpg, gif, png). Click **Add more image file**; then select files in your local PC.

Image Slideshow (1) & Image Slideshow (2)	
Image Slideshow (1) Supported image format : JPG, GIF, PNG 1 banner3.jpg 400x360 (120 KB) ✕ Add image file <input type="button" value="Upload"/>	Indulge Yourself with Our Selected Herb Tea at ONLY Herb Garden 
Image Slideshow (2) Supported image format : JPG, GIF, PNG 1 banner4.jpg 400x360 (128 KB) ✕ Add image file <input type="button" value="Upload"/>	Herb Garden Afternoon Tea Special 

NOTE

xPost DOES NOT support CMYK image format. Please DO NOT upload images files in CMYK format. If you accidentally upload a CMYK image, it may cause some problems. Please contact CAYIN for the solution.

Appendix A: Country Flag Codes for lobbyPost

If you want to retrieve exchange rate data from a remote XML file, you need to edit the XML with our format. Please refer to the following codes if you want to use the code, “**country_id**”. For more information, please refer to **7-5-2**.

Appendix B: How To Change Clock Settings for lobbyPost Template - Mysterious

If you use the **Mysterious** template in lobbyPost, you can set your own cities by yourself.

1. Locate the xml file in the xPost server: C:\CayinApps\webapps\cayin\clock_xml\1.xml
2. Modify the the time zone and city name in the xml file based on your requirement.

1024x768 (Horizontal)	1360x768 (Horizontal)	1024x768 & 1360x768 (Vertical)
4 clocks	6 clocks	3 clocks

```
<?xml version="1.0" encoding="utf-8"?>
```

```
<items>
```

```
<item>
```

```
<param name="timezone_1" value="8"/>
```

-----> No. 1 clock's time zone

```
<param name="timezone_2" value="-5"/>
```

```
<param name="timezone_3" value="9"/>
```

```
<param name="timezone_4" value="0"/>
```

```
<param name="timezone_5" value="6"/>
```

```
<param name="timezone_6" value="1"/>
```

```
<param name="cityname_1" value="Taipei"/>
```

-----> No. 1 clock's city name

```
<param name="cityname_2" value="New York"/>
```

```
<param name="cityname_3" value="Tokyo"/>
```

```
<param name="cityname_4" value="London"/>
```

```
<param name="cityname_5" value="Melbourne"/>
```

```
<param name="cityname_6" value="Paris"/>
```

```
</item>
```

```
</items>
```

If your selected template includes 6 clocks, you need to configure 6 clock settings. Otherwise, those clocks you don't have any settings will show N/A on the screen.

NOTE

This template can only have one set of clock settings. So, if you have multiple displays in lobbyPost, all clocks showing on different lobby displays will be the same. However, those displays can apply different settings to other areas (such as exchange rate), except clock.

3. Save the xml file back to the xPost server: C:\CayinApps\webapps\cayin\clock_xml\1.xml

Appendix C: How To Get A City ID for Weather Setting in lobbyPost

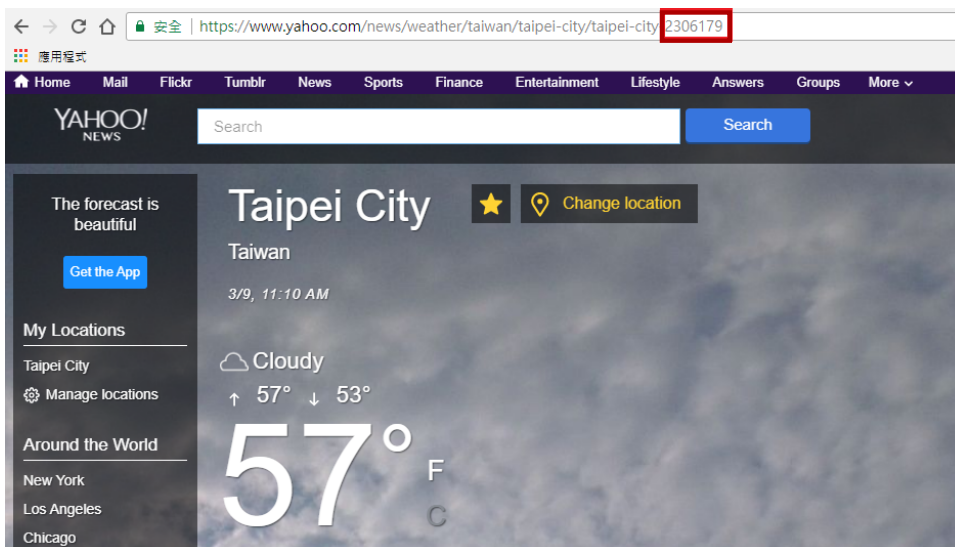

If you want to receive weather data automatically from the Internet (**section 7-5-3**), there are two ways for you to check the city ID.

Yahoo Weather

1. Go to <http://weather.yahoo.com/news/weather/>. Click **Change location** and enter the city name, e.g. Taipei, to search.

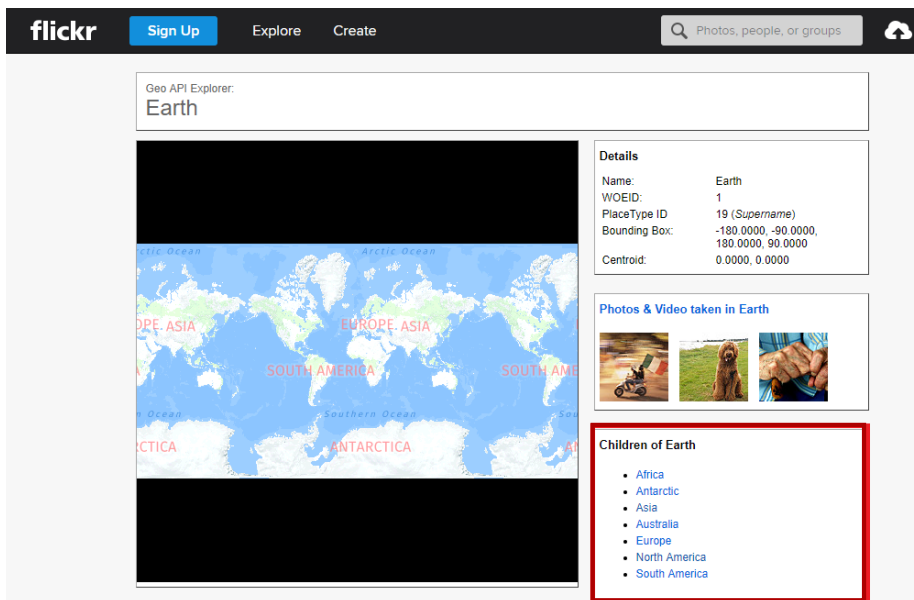

2. Check the **URL** of that page. Then, you will find the city ID (e.g. 2306179).

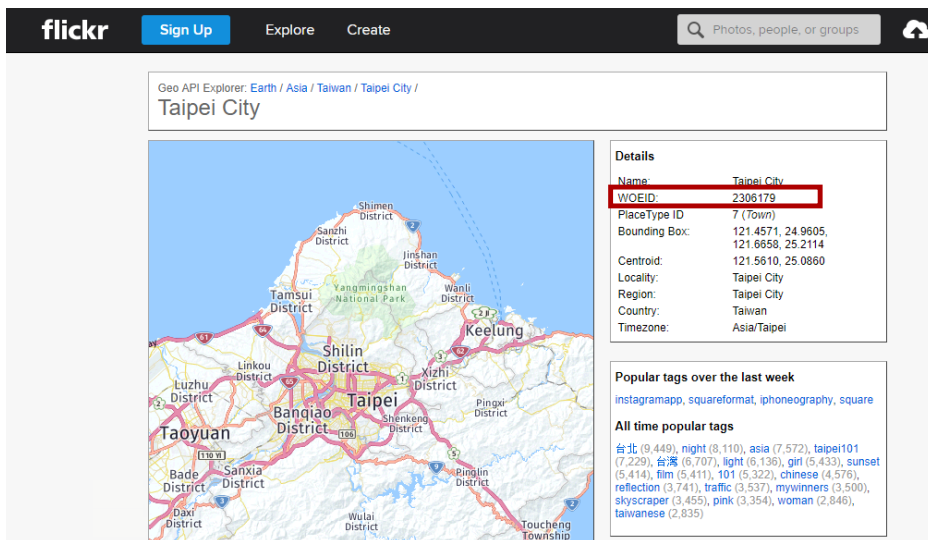

Flickr

1. Go to <http://www.flickr.com/places/info/>. Find your location in **Children of Earth** area.

2. Check the WOEID number. Then, you will find the city ID (e.g. 2306179).

After you get the city ID, just copy this ID and fill in the weather setting. Please refer to section **7-5-3**.

Add a new city		
Country	City Name	City's ID
<input type="text"/>	<input type="text" value="Taipei"/>	<input type="text" value="2306179"/>
<input type="button" value="Apply"/>		<input type="button" value="Close"/>
